

METALLOGRAPHIC
EQUIPMENT & SUPPLIES
CATALOG
2018

Welcome
to the worldwide
headquarters of
LAPMASTER-WOLTERS
in Mount Prospect, IL.
This is home to our
Metallographic
Products Division.

Visit our new
metallographic demo
laboratory featuring
abrasive cutters,
precision saws,
mounting presses,
grinders, polishers,
ultrasonic cleaners,
microscopes, digital
cameras, imaging
software and hardness
testers.

SALES POLICY

Prices are subject to change without notice.

Minimum order \$50.00.

Standard terms Net 30.

All major credit cards accepted.

30 day return policy for supplies. Subject to inspection. May be subject to a restocking fee.

ISO 9001:2008 CERTIFIED

ABRASIVE CUTTERS

TR EVOLUTION SERIES

Our best selling and most affordable abrasive cutters. Designed to fit on any standard laboratory table and made with a built-in recirculating system inside the stainless steel base. The direct drive cast iron motor provides the quietest operation and most efficient motor on the market.

TR80 EVOLUTION

Cut-off wheel diameter	10.00" (250 mm)
Max cutting diameter	3.14" (80mm)
Cast iron motor power	1.75 HP (1.3 kW)
Spindle speed	2800 RPM
Built-in recirculating system	4.75 gallons (18 liters)
Weight	176 pounds (80 kg)
Dimensions	24.50" W x 28.75" D x 21.50" H
Power Supply	460V/60 Hz/3 phase (Other voltages available)

TR100 EVOLUTION

Cut-off wheel diameter	12.00" (300 mm)
Max cutting diameter	4.00" (100mm)
Cast iron motor power	3 HP (2.2 kW)
Spindle speed	2800 RPM
Built-in recirculating system	4.75 gallons (18 liters)
Weight	176 pounds (80 kg)
Dimensions	24.50" W x 28.75" D x 21.50" H
Power Supply	460V/60 Hz/3 phase (Other voltages available)

TR INOX SERIES

The TR INOX Series provides a much larger sectioning area and the belt driven cast iron motor allows for port holes on either side of the unit for sectioning of long pieces. Each model is available with a built-in recirculating system or a larger, separate recirculating system.

TR80 INOX

Cut-off wheel diameter	10.00" (250 mm)
Max cutting diameter	3.14" (80mm)
Cast iron motor power	3HP (2.2 kW)
Spindle speed	2800 RPM
Built-in recirculating system	6.6 gallons (25 liters)
Weight	286 pounds (130 kg)
Dimensions	33.50" W x 40.50" D x 25.00" H
Power Supply	460V/60 Hz/3 phase (Other voltages available)

TR80 INOX FLOOR MODEL

Same as above plus the following:

Base	Metal cabinet
External recirculating system	10.5 gallons (40 liters)
Weight	352 pounds (160 kg)
Dimensions	33.50" W x 40.50" D x 59.00" H

Available optional recirculating system

Metal INOX frame base with wheeled recirculating system, 26.4 gal.

PETROGRAPHIC SECTIONING

Our large range of cutters can be configured for sectioning of any type of petrographic sample. Our available diamond wheels, cross-feed translation table and special clamping devices provide a quick solution for all rock and mineral sectioning requirements.

ABRASIVE CUTTERS

TR100S INOX FLOOR MODEL

Cut-off wheel diameter	12.00" or 14.00" (300mm or 350mm)
Max cutting diameter	4.00" or 4.75" (100mm or 120mm)
Max cutting length (with optional longitudinal feed work table)	15.75" (400mm)
Cast iron motor power	4 HP or 5 HP (3 kW or 3.7 kW)
Spindle speed	2500 RPM
Built-in recirculating system	10 gallons (40 liters)
Weight	462 pounds (210 kg)
Dimensions	23.50" W x 33.00" D x 71.00" H
Power Supply	460V/60 Hz/3 phase (Other voltages available)
Available feed options	Manual table feed Automatic table feed Automatic wheel feed Manual cross-feed table
Available control panel	PLC Touchscreen

TR100L INOX FLOOR MODEL

Cut-off wheel diameter	14.00" or 16.00" (350mm or 406mm)
Max cutting diameter	4.75" (120mm)
Max cutting length	21.50" (550mm)
Cast iron motor power	5 HP (3.7 kW)
Spindle speed	2500 RPM
Built-in recirculating system	16.40 gallons (100 liters)
Weight	550 pounds (175 kg)
Dimensions	36.00" W x 54.00" D x 61.00" H
Power Supply	460V/60 Hz/3 phase (Other voltages available)
Available feed options	Manual table feed Automatic table feed Automatic wheel feed Manual cross-feed table
Available control panel	PLC Touchscreen

MT SERIES LARGE PETROGRAPHIC SAMPLES CUTTER

The MT 500 cut-off machine is used for preliminary cuts of large samples (max 400 x 170 mm). It is built with a robust stain-less steel body, with a polycarbonate hood, fastened to a strong steel structure in which a wheeled stainless steel tank is located. The machine has a strong work-table with longitudinal and transversal manual movements for cutting slices. A fast clamping device locks the petrographic sample to the work-table. Cooling and cleaning systems are directly connected to the water supply. When the cutting wheel motor starts, automatically a water-spout hits both sides of the cutting wheel. Water is also sprinkled in the bottom of the machine for cleaning the inside walls.

A metallic grid holds coarser cutting residues while the water falls underneath in the stainless steel tank that is connected to the sewer system of the laboratory. The machine is equipped with a manual washing gun for internal cleaning. Special attention has been paid to guarantee maximal operating security: - the electric board is water tight- the push-button panel has low tension (24 V) - the hood opens only when the cutting wheel is not moving - an internal light allows the control of all cutting steps- full protection of the operator is guaranteed with the strong structure of the cut-off machine, the irremovable cutting wheel guard and the transparent polycarbonate hood. The longitudinal translation can be made automatic using an advancement system with adjustable speed (0-250 mm/min), with engaging clutch and anterior and posterior stop sensors.

MT 500

Cut-off wheel diameter	20.00" (500mm)
Max cutting capacity	6.70" x 15.75"
Cast iron motor power	7 HP
Recirculating system	26.42 gallons (100 liters)
Weight	2,640 pounds
Dimensions	44.00" W x 76.00" D x 68.00" H
Power Supply	460V/60 Hz/3 phase <i>Other voltages available.</i>
Standard feeds	Manual table feed Manual cross-feed

ABRASIVE CUTTERS

SECOMET SERIES

These large abrasive cutters are capable of sectioning extra large parts up to 8.00" x 19.60" in size. The units come standard with a manual table feed semiautomatic wheel feed movement. Optional automation includes automatic table feed with programmable stroke travel, automatic wheel feed and automatic cross feed for cutting slices.

PRECISION SAWS

MICROMET EVOLUTION SERIES

Our most economical precision saws are quite a step up from the old slow speed diamond saws. These units are variable speed/high speed (0-2,100 RPM) and can accommodate silicon carbide wheels for quickly sectioning non-ferrous material and aluminum oxide wheels for quickly sectioning ferrous materials. They can also use CBN blades for sectioning hard ferrous materials and diamond blades on just about any material.

MICROMET EVOLUTION

0.075 gal. (0.28 ltr)
4.30" L x 6.30" W x 7.75" H
33 lbs. (14.97 kg)
12.00" W x 11.75" L x 11.75" H
115V/60 Hz/1 phase
(Other voltages available)

MICROMET SERIES

The MICROMET Series of precision saws offers larger sectioning capability capable of accommodating up to 8.00" cutting wheels and have variable speed/high speed (0-3,000 RPM) capabilities for applications using all types of cutting wheels for sectioning the widest range of materials.

(Other voltages available)

PRECISION SAWS

MICROMET SERIES ACCESSORIES

PRINTED CIRCUIT BOARD TABLE CUTTER ATTACHMENT FOR MICROMET

The table cutter attachment can be installed at the factory on the MICROMET Precision Saw or it can be added in the field to an existing unit.

PETROGRAPHIC THIN SECTIONING SAMPLE HOLDER FOR MICROMET

After proper cleaning of sample, it is cemented to a glass slide and has to be re-sectioned to remove excess material.

This operation may be performed with the MICROMET Precision Saw fitted with the glass slide vacuum sample holder. Thanks to the micrometric movement of the sample holder, it is possible to position the slide in relation to the cutting wheel to obtain specimens of the desired thickness.

PETROGRAPHIC THIN SECTION GRINDING ATTACHMENT FOR MICROMET

This grinding attachment can be connected to the MICROMET Precision Saw and allows the thinning operation of a petrographic sample mounted on a glass slide. The slide is held by a vacuum sample holder. This holder can hold all types of glass slides, including the circular ones with 1" diameter. The structural characteristics of this machine allow thinning without vibrations and the preparation of flat parallel-faced samples. The preparation of thin sections is simple and fast and with reproducible results.

PRECISION SAWS

MICROMET AUTOMATIC SERIES

The MICROMET AUTOMATIC Precision Saw features an automatic electro-hydraulic sample advance system and can accommodate up to 6.00" sectioning wheels

Feed methods

Automatic electrohydraulic sample advance system

Cut-off wheel diameter

4.00" to 6.00" (102mm to 152mm)

Maximum cutting diameter

1.77" with 6.00" wheel

Motor power

1/3 HP (250 W)

Spindle speed

0-3,000 RPM

Built-in recirculating system

1.50 gal. (5.69 ltr)

Weight

99 lbs. (44.90 kg)

Dimensions

19.75" W x 23.75" D x 16.50" H

Power supply

115V/60 Hz/1 phase
(Other voltages available.)

CLAMPING DEVICES FOR ALL MICROMET SERIES PRECISION SAWS

Type A Sample Holder, for irregular shaped samples

Type B Sample Holder, vacuum type to hold glass slides

Type C Sample Holder, for gluing glass slides

Type D Sample Vise, for glass slides

Type E Sample Holder, with "V" groove for bars and tubes

Type F Sample Holder, rotating design for round mounts up to 1.25"
(Type I also required)

Type G Sample Holder, for thin samples

Type I Goniometric Sample Holder for 360° rotation (Type F also required)

Type L Micro Vise

Type M support for small vise and sample holders, 90°

Type P Sample Holder, vacuum type for petrographic glass slides

PRECISION SAWS

SECOTRON MANUAL SERIES

This manual 3-Axis precision saw features a "Y" cutting table for longitudinal movement with a maximum travel of 250mm and ± 0.01 mm accuracy. The, "Z" height of the wheel is controlled by an external crank with 50mm travel and accuracy of ± 0.05 mm.

PRECISION SAWS

SECOTRON PLC SERIES

These automatic 3-Axis Precision Saws feature a touchpad control panel that controls cutting force, feed rate, speed. Length of cut, X-Y direction of table, the motor voltage absorption, work & pause time for step cutting and coolant pump on or off. "Z" height adjustment is controlled by external handle. The cutting force and the table feed rate are automatically adjusted during the cut if the size and hardness of the work-piece changes to maintain a true feed and pressure rate throughout the cut. The body, cutting area and collection basket are made of high quality stainless steel. The T-slotted work table (250x250mm) supports a variety clamping devices to meet every cutting need.

SECOTRON 300 PLC FLOOR MODEL

Available feed methods	Automatic X-Y-Z and Manual Z Axis
Cut-off wheel diameter	10.00" (250mm)
Maximum cutting diameter	1.57" with 5.00" wheel
"Y" Table maximum travel	13.78" (350mm)
"Y" Table accuracy	± 0.01mm
"Z" height maximum travel	8.00" (200mm)
"Z" height accuracy	± 0.05mm
Motor power	5 HP (3.73 kW)
Spindle speed	0 – 3,000 RPM
Built-in recirculating system	3.17 gal. (12.00 ltr)
Weight	330 lbs. (149.69 kg)
Dimensions	24.50" W x 23.50" D x 17.75" H
Power Supply	460V/60 Hz/3 phase (Other voltages available)

MOUNTING PRESSES

IPA SEMIAUTOMATIC SERIES

Our new semiautomatic mounting press provides a tremendous value while producing mounts that are of equivalent quality as any automatic mounting press. Program the heating temperature & time and the cooling temperature, pump up to appropriate pressure and produce an excellent mount in minutes.

IPA SA 30

Mount size	1.25" (30 mm.)
Maximum heating temperature	400F (200 °C)
Cooling temperature	Adjustable to desired temperature
Weight	79.37 lbs. (36 kg)
Dimensions	8.86" W x 18.90" D x 26.77" H
Power supply	115V/60 Hz/1 phase

IPA SA 40

Mount size	1.50" (40 mm.)
Maximum heating temperature	400F (200 °C)
Cooling temperature	Adjustable to desired temperature
Weight	79.37 lbs. (36 kg)
Dimensions	8.86" W x 18.90" D x 26.77" H
Power supply	115V/60 Hz/1 phase

IPA EVOLUTION SERIES

Our best selling and most economical automatic mounting press heats and cools under pressure for excellent edge retention and a mount cooled down to any desired temperature.

IPA EVOLUTION 1.00"

Mount size	1.00"
Maximum heating temperature	400F (200 °C)
Cooling temperature	Adjustable to desired temperature
Weight	55.12 lbs. (25 kg)
Dimensions	8.66" W x 18.90" D x 26.77" H
Power supply	115V/60 Hz/1 phase

IPA EVOLUTION 1.25"

Mount size	1.25"
Maximum heating temperature	400F (200 °C)
Cooling temperature	Adjustable to desired temperature
Weight	55.12 lbs. (25 kg)
Dimensions	8.66" W x 18.90" D x 26.77" H
Power supply	115V/60 Hz/1 phase

IPA EVOLUTION 1.50"

Mount size	1.50"
Maximum heating temperature	400F (200 °C)
Cooling temperature	Adjustable to desired temperature
Weight	55.12 lbs. (25 kg)
Dimensions	8.66" W x 18.90" D x 26.77" H
Power supply	115V/60 Hz/1 phase

MOUNTING PRESSES

IPA SERIES

The IPA can use any type of mounting material and will produce up to 2.56" (65mm) diameter mounts! All models have an optional ultra-deep mold cylinder available which can produce two full 0.63" (16mm) high mounts with spacer included.

IPA 1.25"

Mount size	1.25"
Maximum heating temperature	400F (200 °C)
Cooling temperature	Adjustable to desired temperature
Weight	93 lbs. (42.18 kg.)
Dimensions	15.75" W x 15.75" D x 20.00" H
Power supply	115V/60 Hz/1 phase

IPA 1.50"

Mount size	1.50"
Maximum heating temperature	400F (200 °C)
Cooling temperature	Adjustable to desired temperature
Weight	93 lbs. (42.18 kg.)
Dimensions	15.75" W x 15.75" D x 20.00" H
Power supply	115V/60 Hz/1 phase

IPA 2.00"

Mount size	2.00"
Maximum heating temperature	400F (200 °C)
Cooling temperature	Adjustable to desired temperature
Weight	93 lbs. (42.18 kg.)
Dimensions	15.75" W x 15.75" D x 20.00" H
Power supply	115V/60 Hz/1 phase

IPA 65

Mount size	2.50" (65mm)
Maximum heating temperature	400F (200 °C)
Cooling temperature	Adjustable to desired temperature
Weight	93 lbs. (42.18 kg.)
Dimensions	15.75" W x 15.75" D x 20.00" H
Power supply	115V/60 Hz/1 phase

IPA EMA

Mount size	Exchangeable Mold Assembly. Unit comes standard with a 2.00" Mold Cylinder and there are optional 1.25" and 1.50" Mold Sleeves available.
Maximum heating temperature	400F (200 °C)
Cooling temperature	Adjustable to desired temperature
Weight	93 lbs. (42.18 kg.)
Dimensions	15.75" W x 15.75" D x 20.00" H
Power supply	115V/60 Hz/1 phase

MOUNTING PRESSES

IPA ELECTROHYDRAULIC SERIES

A robust automatic mounting press that has a built-in electrohydraulic pump so there is no need for incoming compressed air connection. Can accept all forms of mounting powders and will make from 1.25" to 2.00" mounts.

IPA ELECTROHYDRAULIC 1.25"

Mount size	1.25"
Maximum heating temperature	400F (200 °C)
Cooling temperature	Adjustable to desired temperature
Weight	72 lbs. (32.66 kg.)
Dimensions	8.00" W x 19.00" D x 27.50" H
Power supply	115V/60 Hz/1 phase

IPA ELECTROHYDRAULIC 1.50"

Mount size	1.50"
Maximum heating temperature	400F (200 °C)
Cooling temperature	Adjustable to desired temperature
Weight	72 lbs. (32.66 kg.)
Dimensions	8.00" W x 19.00" D x 27.50" H
Power supply	115V/60 Hz/1 phase

IPA ELECTROHYDRAULIC 2.00"

Mount size	2.00"
Maximum heating temperature	400F (200 °C)
Cooling temperature	Adjustable to desired temperature
Weight	72 lbs. (32.66 kg.)
Dimensions	8.00" W x 19.00" D x 27.50" H
Power supply	115V/60 Hz/1 phase

IPA ELECTROHYDRAULIC 65

Mount size	2.50" (65mm)
Maximum heating temperature	400F (200 °C)
Cooling temperature	Adjustable to desired temperature
Weight	72 lbs. (32.66 kg.)
Dimensions	8.00" W x 19.00" D x 27.50" H
Power supply	115V/60 Hz/1 phase

IPA ELECTROHYDRAULIC EMA

Mount size	Exchangeable Mold Assembly. Unit comes standard with a 2.00" Mold Cylinder and there are optional 1.25" and 1.50" Mold Sleeves available.
Maximum heating temperature	400F (200 °C)
Cooling temperature	Adjustable to desired temperature
Weight	93 lbs. (42.18 kg.)
Dimensions	15.75" W x 15.75" D x 20.00" H
Power supply	115V/60 Hz/1 phase

MOUNTING PRESSES

COMPUPRES ELECTROHYDRAULIC SERIES

Featuring an easy-to-use touchpad LCD display, the COMPUPRES can store all parameters (mounting media name, pressure, heating time, heating temperature, and cool down temperature) for up to 100 mounting procedures. This unit comes standard with an interchangeable 2.00" Mold Cylinder and there are optional 1.00" 1.25" and 1.50" mold sleeves available. The COMPUPRES is also capable of producing two standard size mounts simultaneously with an available duplex spacer.

COMPUPRES

Standard mount size	2.00"
Available mold sleeves	1.00", 1.25" & 1.50"
Maximum heating temperature	400F (200 °C)
Cooling temperature	Adjustable to desired temperature
Weight	120 lbs. (54 kg)
Dimensions	15.75" W x 15.75" D x 20.00" H
Power supply	115V/60 Hz/1 phase (Other voltages available)

COLD MOUNTING ACCESSORIES

VACUUM IMPREGNATION SYSTEM

Friable and porous samples, without the structural characteristics to allow the cut or not sold enough to allow the preparation of the cementing surface, must be embedded in cold resins using the proper molds. Vacuum impregnation equipment allows the embedding of sand-like samples and the impregnation of delicate and fragile samples. Thanks to a translatable and rotatable crucible, it is possible the separate deaeration of the sample and of the resin. Once the proper vacuum has been achieved, the resin can be poured on the sample. This procedure allows the preparation of compact and bubble free samples.

TECHNOMAT PRESSURE CHAMBER

When fast-curing resins are allowed to set in a pressure unit, one obtains bubble- and pore free samples. The physical and chemical properties of the resin however remain completely unchanged. This pressure unit that was designed to suit the special technology of fast-curing resins. The pressure level of 2.0 bar was chosen to make allowance for the polymerization behavior of the cold polymer which is used for embedding metallographic specimens and for taking surface impressions in materials testing.

PETROGRAPHIC THIN SECTION CEMENTING DEVICE

Once you have a flat thin section, you can cement it to a glass slide. The sample cemented to the glass slide can then be sectioned and/or ground down to desired thickness. This device for cementing petrographic samples is built with a robust structure having four pressing springs with plastic pressure discs. This provides parallel mounted specimens using a minimal quantity of cement.

HOT PLATE

A hot plate with adjustable temperature may accelerate the bonding process when used in conjunction with Thin Section Cementing Device.

GRINDERS & POLISHERS

COMPUPLAN COARSE STONE GRINDING MACHINE

For rapid removal of material on the initial grinding step to produce a sample holder of planar mounts, the COMPUPLAN is the right choice. Featuring a newly designed dressing tool system and large roll-out recirculating coolant system, this heavy duty machine compliments a high volume sample preparation process at a great value.

COMPUPLAN

Dimension of grinding wheel	14.00" x 1.75" (355mm x 44mm)
Power of wheel motor	4 HP
Grinding wheel max speed	1,500 RPM
Power head motor power	1/3 HP
Sample holder rotation speed	150 RPM
Weight	551 pounds (249.93 kg)
Dimensions	31.00" W x 24.00" D x 57.00" H
Power supply	460V/60 Hz/3 phase (Other voltages available)

BG100 BELT GRINDER

This wet or dry belt grinder uses standard 4" x 36" abrasive belts features a device and options to hold 1.00", 1.25" or 1.50" metallurgical mounts perpendicular while grinding. This is especially useful for edge rounding and minimizing sample preparation times for automatic polishers.

BG100

Belt size	4" x 36" (102mm x 914mm)
Motor power	0.75 HP
Cooling system	Water
Spindle speed	2,800 RPM
Weight	120 lbs. (53 kg)
Dimensions	24.75" W x 20.00" D x 14.75" H
Power supply	115V/60 Hz/1 phase (Other voltages available)

GRINDERS & POLISHERS

RG500 ROLL GRINDER

This 5-station hand grinder allows the ability to prepare samples from coarse-to-fine grinding. With the 3-7/16" x 60' abrasive rolls available from 240 to 1200 grit; anyone can produce nearly polished samples in minutes. The unit has an easy advancement system to remove used abrasive and provide a fresh abrasive roll area for consistent and rapid grinding. There is a water flow adjustment valve for proper lubrication.

VP200 VIBRATORY POLISHER

The VP200 is a 12" vibratory polisher designed to prepare even the most difficult to polish materials with a very gentle polishing action. Polishing is accomplished by setting the default frequency so that the sample begins to vibrate. Changing the voltage varies the rotational speed. The unit features an interchangeable polishing bowl and variety of available sample holders and weights

GRINDERS & POLISHERS

LS SERIES – BASE UNITS

The LS Series is our grinder/polisher base available as the base unit alone or can be upgraded to an auto polisher with our LSA Series or LS DIGITAL Series of Power Heads. The wheel speeds available are single speed, two speed or variable speed. We offer 8", 10", 12" and now extra large 16" and 24" models.

LS1

Wheel diameter 8" (200 mm)
 Wheel Speed 300 RPM - single speed
 Weight 69 lbs (31 Kg)
 Dimensions 14.50" W x 19.75" D x 11.75" H
 Power supply 115V/60 Hz/1 phase

LS1 / LS2

Wheel diameter 8" (200 mm)
 Wheel Speed 300 RPM (Left side)
 0-300 (Right side)
 Weight 69 lbs (31 Kg)
 Dimensions 14.50" W x 19.75" D x 11.75" H
 Power supply 115V/60 Hz/1 phase

LS2

Wheel diameter 8" (200 mm)
 Wheel Speed 0-300 RPM - variable speed
 Weight 69 lbs (31 Kg)
 Dimensions 14.50" W x 19.75" D x 11.75" H
 Power supply 115V/60 Hz/1 phase

LS2 / LS2

Wheel diameter 8" (200 mm)
 Wheel Speed 0-300 RPM (Left side)
 0-300 RPM (Right side)
 Weight 69 lbs (31 Kg)
 Dimensions 14.50" W x 19.75" D x 11.75" H
 Power supply 115V/60 Hz/1 phase

GRINDERS & POLISHERS

LS250

Wheel diameter 10" (250 mm)
 Wheel Speed 0-300 RPM – variable speed
 Weight 71 lbs (32 Kg)
 Dimensions 14.50" W x 19.75" D x 12.00" H
 Power supply 115V/60 Hz/1 phase

LS250 TWIN

Wheel diameter 10" (250 mm)
 Wheel Speed 0-300 RPM (Left side)
 0-300 (Right side)
 Weight 69 lbs (31 Kg)
 Dimensions 14.50" W x 19.75" D x 11.75" H
 Power supply 115V/60 Hz/1 phase

LS3

Wheel diameter 12" (300 mm)
 Wheel Speed 150/300 RPM – 2 speed
 Weight 71 lbs. (32 kg)
 Dimensions 14.50" W x 19.75" D x 12.00" H
 Power supply 115V/60 Hz/1 phase

LS3V

Wheel diameter 12" (300mm)
 Wheel Speed 0-300 RPM – variable speed
 Weight 71 lbs. (32 kg)
 Dimensions 14.50" W x 19.75" D x 12.00" H
 Power supply 115V/60 Hz/1 phase

GRINDERS & POLISHERS

LS3V TWIN

Wheel diameter 12" (300 mm)
 Wheel Speed 0-300 RPM (Left side)
 0-300 (Right side)
 Weight 69 lbs. (31 kg)
 Dimensions 14.50" W x 19.75" D x 11.75" H
 Power supply 115V/60 Hz/1 phase

LS400

Wheel diameter 16" (400mm)
 Wheel Speed 0-300 RPM - variable speed
 Weight 92 lbs. (41 kg)
 Dimensions 18.00" W x 19.75" D x 11.75" H
 Power supply 115V/60 Hz/1 phase

LS600

Wheel diameter 24" (600mm)
 Wheel Speed 0-300 RPM – variable speed
 Weight 92 lbs. (41 kg)
 Dimensions 26.00" W x 27.00" D x 12.75" H
 Power supply 115V/60 Hz/1 phase

GRINDERS & POLISHERS

LSA SERIES – POWER HEADS

Our most economical, non-programmable power heads for automatic polishing. The LSA Series can be configured with Central Pressure for use with sample holders that lock in the samples and the power head rotational force is applied down to center of the sample holder towards the base unit.

The power heads can also be configured with Central Force and Individual Mount Force with six pistons applying force to anywhere from one to six mounts loosely held in an appropriate sample holder.

The power heads are available with a fixed head or with an optional swivel head that allows you to position the sample holder wherever you want in relation to the grinding/polishing wheel.

The LSA Series Power Heads can be configured on any single or dual LS Series base unit.

LSA-FOR LS2 BASE WITH 8" WHEEL

Sample pressure	29-58 PSI (2 to 4 bar)
Timer	1 to 99 minutes
Power head rotational speed	40 RPM
Power head weight	55 lbs.
Power head dimensions	10.50" W x 15.75" D x 17.00" H
Power supply	115V/60 Hz/1 phase (Other voltages available)

LSA-FOR LS250V BASE WITH 10" WHEEL

Sample pressure	29-58 PSI (2 to 4 bar)
Timer	1 to 99 minutes
Power head rotational speed	40 RPM
Power head weight	55 lbs.
Power head dimensions	10.50" W x 15.75" D x 17.00" H
Power supply	115V/60 Hz/1 phase (Other voltages available)

LSA-FOR LS3V BASE WITH 12" WHEEL

Sample pressure	29-58 PSI (2 to 4 bar)
Timer	1 to 99 minutes
Power head rotational speed	40 RPM
Power head weight	55 lbs.
Power head dimensions	10.50" W x 15.75" D x 17.00" H
Power supply	115V/60 Hz/1 phase (Other voltages available)

GRINDERS & POLISHERS

LS DIGITAL SERIES – POWER HEADS

The LS DIGITAL Power Heads have a touchpad control panel for storing all parameters and multiple steps of a sample preparation procedure including wheel speed, pressure, direction of sample holder, time, water, oil and the optional automatic dispensing system.

The power head can be configured with Central Pressure for use with sample holders that lock in the samples and the power head rotational force is applied down to the center of sample holder towards the base unit.

The power heads can also be configured with Central Force and Individual Mount Force with six pistons applying force to anywhere from one to six mounts loosely held in an appropriate sample holder.

The power heads are available with a fixed position head or with an optional swivel head that allows you to position the sample holder wherever you want in relation to the grinding/polishing wheel.

The LS DIGITAL Power Heads can be configured on any single or dual LS Series base unit.

GRINDERS & POLISHERS

COMPUMET SERIES – AUTOMATIC POLISHING SYSTEMS

The COMPUMET Auto Polishers have a touchpad control panel for storing all parameters and multiple steps for up to 60 sample preparation procedures including wheel speed, pressure, direction of sample holder, time, water, oil and the automatic dispensing system. The automatic dispensing system is standard on the 12" model and optional with the 8" and 10" models.

The power head can be configured with Central Pressure for use with sample holders that lock in the samples and the power head rotational force is applied down to the center of the sample holder towards the base unit.

The power head can also be configured with Central Force and Individual Mount Force with six pistons applying force down to anywhere from one to six mounts loosely held in an appropriate sample holder.

The COMPUMET is available with a fixed head or with an optional motorized oscillating head that moves the position the sample holder left-to-right across the polishing wheel for maximum use of the abrasive discs and polishing pads.

GRINDERS & POLISHERS

PETROGRAPHIC THIN SECTION GRINDER/POLISHERS

PETROPOL 801

The PETROPOL 801 Petrographic Polisher is designed to automatically polish petrographic samples with a thinning device that attaches the glass slides by vacuum and features a micrometer to regulate sample thickness. The 8" (200mm) aluminum polishing wheel is variable speed (0-300 RPM) and includes a lapping oil dispenser to assist with precise sample preparation.

PETROPOL 806

The LAPMASTER PETROPOL 806 Petrographic Polisher is designed to automatically polish up to six petrographic samples adhered to 28mm x 48mm glass slides with pressure applied by weights. The 8" (200mm) aluminum polishing wheel is variable speed (0-300 RPM) and features a lapping oil dispenser to assist with easy and quick sample preparation.

GRINDERS & POLISHERS

PETROGRAPHIC ROCK CORE SAMPLE GRINDER/POLISHER

LS2/RCS

The LS2/RCS Rock Core Sample Grinder/Polisher can accommodate a wide variety of rock core or cylindrical samples by means of a custom-sized containment cylinder. The unit features the rock core sample holder attachment with containment cylinder and cylinder inner core guide.

LS MSP SERIES LARGE SAMPLE MECHANICAL GRINDER/POLISHERS

The LS2/RCS Rock Core Sample Grinder/Polisher can accommodate a wide variety of rock core or cylindrical samples by means of a custom-sized containment cylinder. The unit features the rock core sample holder attachment with containment cylinder and cylinder inner core guide.

LS400 MSP

Wheel diameter	16" (400mm)
Wheel Speed	0-300 RPM – variable speed
Mechanical sample fixture	Included
Weight	107 lbs. (48 kg)
Dimensions	18.00" W x 19.75" D x 24.00" H
Power supply	115V/60 Hz/1 phase

LS600 MSP

Wheel diameter	24" (600mm)
Wheel Speed	0-300 RPM – variable speed
Mechanical sample fixture	Included
Weight	165 lbs. (74kg)
Dimensions	26.00" W x 27.00" D x 24.00" H
Power supply	115V/60 Hz/1 phase

GRINDERS & POLISHERS

MINIMO PORTABLE GRINDER/POLISHER

MINIMO

The MINIMO is a portable grinder/polisher with a 1.25" (30mm) 90° rotating grinding/polishing disc. The disc head is variable speed (1,400 – 14,200 RPM). Silicon carbide abrasive discs and polishing pads are available along with all standard loose abrasives. An optional portable power station with rechargeable batteries is available.

PULITROL SERIES ELECTROLYTIC POLISHERS

PULITROL

The PULITROL provides effective electrolytic polishing and etching for all metals and alloys. The power source controls can be easily adjusted for polishing/etching tension, current and time.

PULITROL S

The PULITROL S has all of the features of the PULITROL plus a built-in database that stores up to 40 user definable polishing and etching methods for a wide variety of metals and alloys. You can polish and etch separately or automatically switch from polishing to etching if the automatic process is selected.

BT V SERIES

The BTV Series of ultrasonic cleaners are economical yet powerful, stainless steel benchtop cleaning systems. Each model has digital LCD controls for ultrasonic and heater functions, control cycle times and temperature settings up to 175° F (80° C). The ultrasonic sound waves move through the cleaning solution for rapid break-down of microscopic cleaning bubbles that can enhanced with heat. All units come with a standard stainless steel basket for holding submersed samples and easy removal.

METAL SUPPORT CABINET

Reinforced stand with swing door and storage area. This cabinet can support heavy equipment such as abrasive cutters and auto polishers.

Dimensions: 35.50" W x 40.50" D x 33.00" H

POKER METALLOGRAPHIC SAMPLES STORAGE CABINET

Multifunctional Wood Storage Cabinet with 10 drawers. Each drawer supplied with a plastic container tray for 100 - 1.25" (30mm) metallographic samples.

Dimensions: 18.50" W x 25.60" D x 34.30" H

POLISHING WHEELS SUPPORT STAND

This stainless steel stand can organize and support up to six polishing wheels.

The Excelis HD color microscopy camera set a new standard for excellence in high definition imaging for scientific and industrial applications. The Excelis HD is a full-featured HD cameras offering 60fps in video preview with unrivaled color fidelity and on-board image capturing software.

- 1080p color camera with live video preview without any lag time or compression
- HDMI & USB 2.0 output for video and images
- Built-in mouse control software for HDMI viewing/recording without a computer
- Simultaneous live image output to an HD monitor to a computer via USB 2.0
- On-board camera software with basic image controls (PC & Mac compatible)
- CaptaVision PC Imaging Software for more advanced image control, annotation & analysis
- Exposure time of 0.001 seconds to 10 seconds, 20 scales of Gain value and incredibly efficient 3D noise reduction for fluorescence applications
- Dual FPGA processors and unique algorithms produce perfect color reproduction

Sensor/Adapter	1/2.7" / 0.5x C-mount recommended; SONY IMX236
Resolution	1920 X 1080
Frame Rate	HDMI: 60fps / USB 2.0: 30fps
Image Capture	Hi Speed SD Card (8 GB)
Video Capture	HDMI: 1080p, 30fps to SD Card / USB 2.0: 1080p, 30fps to PC or Mac
Exposure Time	0.001 sec – 10.0 sec (8 GB)
White Balance	Auto
Settings	Gain, Gamma, Saturation, Contraction
Built-In Software	Cloud 1.0 (With live image measurement)
PC Imaging Software	CaptaVision Imaging Software (for PC only; Mac OS not supported) Advanced Camera Controls: live/still image measurement and annotation, flat field correction; extended depth of focus (focus stacking); image stitching; fluorescence image settings; fluorescence multi-color channel mixer merge; HDR (High Dynamic Range) function Image Types: JPEG, BMP, TIFF, and RAW
Output Modes	Mode 1: USB 2.0 / Mode 2: HDMI
System Compatibility	Windows XP, Vista 7 and 8 (32 or 64-bit) Mac OS X (for image transfer to Mac OS X only)
System Requirements	Intel Processor (Core 2 Duo or higher); 2GB memory or more; USB 2.0 Hi-Speed port
Power Supply	CD12V/1A
Warranty	1 Year
Standard Items	Excelis HD Camera, HDMI Cable, USB 2.0 Cable, 12V Power Adapter, 8GB SD Card, USB Mouse, CaptaVision PC Imaging Software

DIGITAL CAMERAS & SOFTWARE

UNITRON AU-600-HDS EXELIS HD

This package includes the Exelis AU-600-HD Digital Camera & Software (as described on prior page) and our 11.6" HD monitor that is attached directly to the camera.

The new Exelis HDS Camera & Monitor Systems allow users to view and capture images and video directly to the supplied SD card without the need for a computer or separate monitor! The 11.6" HD display offers beautiful, crystal-clear image quality, and vibrant, true-to-life color with exceptional viewing from all angles. It can be used as a stand-alone system, or connected to a PC via USB cable where images can be displayed simultaneously on the Exelis HDS monitor and the PC.

For even more flexibility and ideal for teaching environments, the HDMI architecture allows Exelis HDS to be connected to an HDMI-enabled projector as well.

Exelis HDS
Camera & Monitor System

- 1080p color camera with live video preview without any lag time or compression
- HDMI & USB 2.0 output for video and images
- Built-in mouse control software for HDMI viewing/recording without a computer
- Simultaneous live image output to an HD monitor to a computer via USB 2.0
- On-board camera software with basic image controls (PC & Mac compatible)
- CaptaVision PC Imaging Software for more advanced image control, annotation & analysis
- Exposure time of 0.001 seconds to 10 seconds, 20 scales of Gain value and incredibly efficient 3D noise reduction for fluorescence applications
- Dual FPGA processors and unique algorithms produce perfect color reproduction

Monitor	Mountable 11.6" HD Display (mounting hardware included)
Contrast	1000:1
Dot Pitch	0.1338mm
Input Modes	AC power, HDMI
Warranty	1 Year
Standard Items	Exelis HD Camera, 11.6" HD Monitor with mounting brackets/hardware, HDMI Adapter, Y Power Splitter, HDMI cable, USB 2.0 Cable, 12V Power Adapter, 8 GB SD Card, USB Mouse, CaptaVision PC Imaging Software

MEIJI TECHNO HD1500 MET

The HD1500MET is our full featured 6 MP camera with a 1/3" CMOS chip. A 0.3X C" mount adapter (MA151/35/03) is needed to attach it to any standard Meiji Techno America Trinocular Microscope. The HD1500MET features a full HD (1080x1920) resolution, which provides high fidelity images with a refresh rate of 60fps- frames per second when connected via HDMI, so there is absolutely no lag in the live video feed when moving your specimen or part. Included with the 11.8" High Definition display is a mounting kit that allows the display to be mounted directly in front of the HD1500MET.

The HD1500MET provides extremely powerful measurement functionality including: freehand lines, rectangles, polygons, circles, bicircles, angles, point-line distance and much more. In addition to the ability to measure point-line distance, angles, the length of curves and lines, the camera can measure the perimeter & area of enclosed features such as: rectangles, polygons, and circles. The unique calibration and magnification functions coupled with the ability to export the results to Excel or text files, make the measurements more convenient and simple.

Sensor	1/2.8" CMOS
C-mount	0.3X
Megapixels	2 - 6 MP
Resolution	3264 x 1840 Static, 1920 x 1080 Dynamic
Frame Rate	60fps by HDMI, 30fps by USB 2.0
Image Capture	Hi Speed SD Card (8GB)
Video Capture	HDMI: 1080p, 30fps to SD Card / USB 2.0: 1080p, 30fps to PC or Mac
System Compatibility	Windows XP, Vista 7 and 8 (32 or 64-bit) Mac OS X (for image transfer to Mac OS X only)
System Requirements	Intel Processor (Core 2 Duo or higher); 2GB memory or more; USB 2.0 Hi-Speed port
Warranty	1 Year
Standard Items	HD1500MET Camera, 11.8in HDMI Monitor, HDMI Cable, USB Cable, 12V AC/DC Power adapter, SD Card, Mouse , Application Metrics Software ISCapture

MEIJI TECHNO HD1500MET-M

This package includes the HD1500MET Digital Camera & Software (as described on prior page) along with a 11.8" HD monitor that is attached directly to the camera.

Included with the 11.8" High Definition display is a mounting kit that allows the display to be mounted directly in front of the HD1500MET-M.

The 11.8" High Definition display is used with the provided USB 2.0 mouse, with this the user can access menus that provide all the features of the camera such as exposure, white balance, color control (red or blue), gamma, brightness, sharpness, saturation, denoise, color temperature plus allows the user to save images and videos directly on the full SD card due to the onboard operating system.

You can flip the image horizontally, vertically, do a split screen where-in one side of the monitor is a live image and the other half is the captured image. You can also digitally increase/decrease the zoom if needed if your stereo system has reached it's magnification potential, this will give you the added digital magnification needed.

Superimpose a cross-line reticle directly on your live image, first click gives you a red line second click gives you a green line, and the third click omits the crossline. The live video and still shots can be saved directly on the removable full SD card for subsequent image capture. All this is achieved without the need for a PC. You may also connect directly to any monitor or TV with a HDMI port for a wider view if necessary. All USB 2.0, HDMI, SD card, power supply is all supplied.

Monitor	Mountable 11.8" HD Display (mounting hardware included)
Contrast	1000:1
Dot Pitch	0.1338mm
Input Modes	AC power, HDMI
Warranty	1 Year
Standard Items	HD1500MET-M Camera, 11.8in HDMI Monitor, HDMI Cable, USB Cable, 12V AC/DC Power adapter, SD Card, Retina Screen, Mouse , "L" Bracket Adapter for Monitor to Camera connectivity, Application Metrics Software IScapture

DIGITAL INSPECTION SYSTEMS

UNITRON INSPEX HD 1080P

The Inspex HD 1080p is a modular digital inspection system offering 1080p images at 60fps. With an integrated LED light, removable USB image capture, and a wide variety of mounting and stand options, the Inspex HD 1080p is a best-in-class solution.

Inspex HD 1080p has a simple to use on-screen menu that enables many of the camera features. An optional external controller enables the use of three memory pre-sets, infrared mode, real time dimensioning grids, exposure and focus control.

An ideal instrument for production areas, micro-assembly work, electronics, inspection, gross imaging, quality control, presentation and training applications.

(Inspex HD 1080p shown with optional monitor)

Maximum Field of View	11.02" (280mm) x 6.46" (164mm)
Camera Resolution	HD 1080p (1920 x 1080)
Connections	HDMI out, USB for image capture
Focus	Auto / Manual
Illumination	Adjustable LED illumination
Response Time	5 ms
Input/Output Modes	HDMI Output; USB 2.0 x4 RJ45 Ethernet network connector General purpose IO port x3; DC 24v power jack
Recommended Monitor	16:9 DVI & HDMI Response time: 5ms Signal: Full HD 1080p— monitor not included
Standard Items	Auto / Manual Focus, Image Capture, Brightness Adjustment, Magnification Adjustment, Snapshot, Overview, High Contrast Mode, Height Adjustable

UNITRON OMNI 1080P

The OMNI Digital Imaging System is an integrated full HD (1080p) digital microscope and measurement system that operates without a PC. The custom platform incorporates a highly configurable and upgradeable set of inspection and measurement applications such as focus stacking, 2D measurement, side by side and overlay image comparison, custom on-screen reticle, and lens distortion correction.

The OMNI's platform has a powerful image processing and control engine that delivers superb full HD live video image quality at 60 frames per second enabling it to be used as a solution in a broad range of quality control, testing, rework, assembly, inspection and documentation tasks.

The GUI (Graphical User Interface) is a custom designed mouse-controlled interface delivering intuitive and efficient operation and control of the full application suite.

Its unique ability to stay in calibration over the entire zoom range is one of many features that differentiates this system from other digital inspection systems.

Camera control functions (auto/manual focus, exposure, gain, brightness, white balance) ensure ultra-sharp, high contrast imaging.

The OMNI's quick response, cable-free interchangeable illumination modules with intensity and quadrant control, ensure shadow-free illumination and glare reduction.

Maximum Field of View	9.10" (231mm) x 5.35" (136mm)
Camera Resolution	HD 1080p (1920 x 1080); 60fps; 30x optical / 2x digital
Zoom	5D lens; 2.5x-122x (24" screen)
Basic Functions	Auto / Manual focus, brightness adjustment, magnification adjustment, snapshot, overview, high contrast mode, height adjustable
Response Time	5 ms
Input/Output Modes	HDMI Output; USB 2.0 x4 RJ45 Ethernet network connector General purpose IO port x3; DC 24v power jack
Monitor Format	HD ready or Full HD16:9 (recommended) – monitor not included

HARDNESS TESTERS

MICROHARDNESS TESTERS

900-391D SINGLE INDENTER

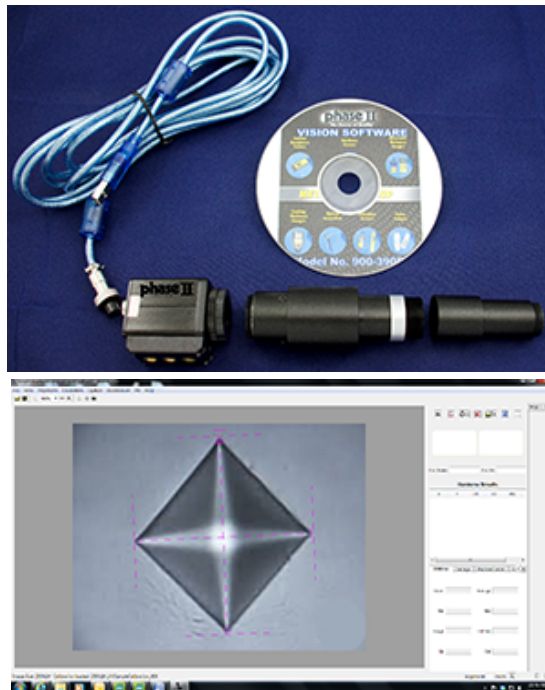

Includes single indenter (Vickers or Knoop) microhardness tester, 2 objectives (10X & 40X), X-Y stage with digital micrometers, automatic turret control, video camera, camera adapter and USB software for manual and automatic on-screen measurements. This advanced microhardness tester is a state-of-the-art, precise system suitable for microhardness analysis of metallic specimens in laboratories or

production environments.

This system is versatile and user-friendly; designed for accurate hardness testing of small precision parts, thin materials, coatings, wires and case depth determinations.

All of our hardness testers come with a 5 year warranty and free lifetime technical support.

Testing Range	1HV~2967HV
Test Forces	0.098N(10g), 0.246N(25g), 0.49N(50g), 0.98N(100g), 1.96N(200g), 2.94N(300g), 4.90N(500g), 9.80N(1000g)
Max Height of the Specimen	70mm
Carriage Control	Automatic (loading/holding-up of the load/unloading)
Magnification of the microscope	100X & 400X
Dwell Time of the Test Force	0-90 seconds (5 second increments)
Dimension of the X-Y Table	100 × 100mm
Movement Field of the XY Table	25×25mm
Light Source/Power Supply	115V/60 Hz/1 phase (other voltages available)
Net Weight	77.16 lbs. (35kg)
Tester Dimensions	12.01" W x 19.49" D" x 21.65" H
Items Included	Base Machine w/Auto-Turret, X-Y Stage w/ Micrometer, Mini Thin Part Holding Fixture, Mini Drill Chuck Fixture, Mini Vise fixture, Video Cam w/Adapter, Measurement Software, USB Cable

900-392D DUAL INDENTER

Includes dual indenter (Knoop and Vickers) microhardness tester, 3 objectives (10X, 20X & 40X), X-Y stage with digital micrometers, automatic turret control, video camera, camera adapter and USB software for manual and automatic on-screen measurements.

This advanced microhardness tester is a state-of-the-art, precise system suitable for microhardness analysis of metallic specimens in laboratories or production environments.

This system is versatile and user-friendly; designed for accurate hardness testing of small precision parts, thin materials, coatings, wires and case depth determinations. The dual indenters allow switching back-and-forth automatically from performing Vickers indents to Knoop indents. The 3 objectives provide greater magnification flexibility.

All of our hardness testers come with a 5 year warranty and free lifetime technical support.

Testing Range	1HV~2967HV
Test Forces	0.098N(10g), 0.246N(25g), 0.49N(50g), 0.98N(100g), 1.96N(200g), 2.94N(300g), 4.90N(500g), 9.80N(1000g)
Max Height of the Specimen	90mm
Carriage Control	Automatic (loading/holding-up of the load/unloading)
Magnification of the microscope	100X, 200X & 400X
Dwell Time of the Test Force	0-90 seconds (5 second increments)
Dimension of the X-Y Table	100 × 100mm
Movement Field of the XY Table	25×25mm
Light Source/Power Supply	115V/60 Hz/1 phase (other voltages available)
Net Weight	72.75 lbs. (33kg)
Tester Dimensions	12.01" W x 19.49" D" x 21.65" H

HARDNESS TESTERS

MACRO VICKERS HARDNESS TESTERS

900-398B MACRO VICKERS

This Macro Vickers hardness tester features a load cell, closed circuit system and software for manual and automatic on-screen measurements.. Designed for the accurate hardness testing of small precision parts, thin materials, case hardened layers and all sorts of steel components. This unit covers a load range from 1 kg to 50kg, with digital technology. Conforming to ASTM E-384/92 Vickers hardness testing standards, this unit is offered with a 5 year warranty and free lifetime technical support.

The large LCD shows the measuring methods, the testing force, the indentation length, hardness value, the dwell time of the testing force as well as the number of the measurement on its screen. All information such as diagonal lines length of indentation, hardness values, data statistics and hardness conversions can be displayed on the LCD as well as your laptop or PC.

Testing Range	1HV~2967HV
Test Forces	9.807x 19.61x 24.52x 29.42x 49.03x 98.07x 196.1x 249.2x 490.3 N 1x 2x 2.5x 3x 5x10x 20x 30x 50 kgf
Max Height of the Specimen	170mm
Carriage Control	Automatic (loading/holding-up of the load/unloading)
Magnification of the microscope	100X, 200X
Dwell Time of the Test Force	0-60 seconds
Min.Graduation Value of the Testing Drum Wheel	0.125um
Light Source/Power Supply	115V/60 Hz/1 phase (other voltages available)
Package Dimensions	8.86" W x 21.06" D x 22.84" H
Items Included	Base Machine, Video Cam w/ Adapter, Measurement Software, Large test table, "V" Shape test table, 10X Digital Micro Lens, Bullseye Level, Adjustable Screw, Vickers Hardness Block, RS232 Interface Line

HARDNESS TESTERS

ROCKWELL/SUPERFICIAL HARDNESS TESTERS

900-388 DIGITAL-LOAD CELL- MOTORIZED-ROCKWELL/SUPERFICIAL WITH AUTOMATED Z-AXIS

Automated Z-Axis. Just press START key once, entire test process will be finished automatically. Regardless of the size of the sample, the position of the sample, the distance between the indenter and sample surface. The sample will be auto-lifted to approach the indenter and finish hardness testing automatically.

Extended dolphin nose allows vertical hardness test height of 11.8" and throat depth of 8.6".

Built-in micro-printer.

Horizontal dolphin nose Indenter is suitable also for internal and external hardness testing.

Rockwell Hardness Testing on Surfaces difficult to reach. Hardness Testing internal surface of rings and tubes.

The tester meets the following standards: ISO 6508-2, ASTM E18.

Minor Load	29.4N \pm 3kgf \pm , 98.1N (10kgf)
Major Load	147.1N(15kgf), 294.3N(30kgf), 441.3N(45kgf), 588.4N (60kgf), 980.7N (100kgf), 1471N (150kgf)
Test Force Application	Load Cell Closed Loop
Test Force Control	Motorized
Results Display	Hi Def LCD Readout
Resolution	0.1HR
Vertical Capacity	7.80"
Throat Depth	5.90"
Dimensions	23.62" W x 9.84" D x 27.56" H
Weight	190 lbs.
Power Supply	115V/60 HZ/1 phase
Items Included	C/N scale Diamond Indenter 1/16" Ball Indenter 120° cone diamond indenter 2- HRC test Blocks 1- HRB Test Block 2- HRN Test Block 1- HRT Test Block Test Table 5.87" (150mm) Flat Anvil 2.5" (63mm) Std. V- Anvil Dust Cover Accessory Case

HARDNESS TESTERS

900-387 DIGITAL-LOAD CELL- MOTORIZED-ROCKWELL/SUPERFICIAL

This digital Rockwell/Superficial Rockwell hardness tester with fully automated load/unload procedures affords highly sensitive and accurate readings. Micro computer controlled Touch Screen with USB output to PC. The 900-387 digital Rockwell hardness tester offers programmable scale conversions, dwell times, statistical capabilities and test counter. Capable of testing in all of the regular Rockwell hardness scales

Direct Loading Method With Load-Cell Instead of Dead Weight System. High Speed Test Cycle and Extremely Accurate Loading Control

Automatic conversions to HB, HV, Other Rockwell Scales

Touch Screen selectable system

Upper/Lower Limit Settings

Minor Load	29.4N 3kgf, 98.1N (10kgf)
Major Load	147.1N(15kgf), 294.3N(30kgf), 441.3N(45kgf), 588.4N (60kgf), 980.7N (100kgf), 1471N (150kgf)

Test Force Control	Motorized
Results Display	Hi Def LCD Readout
Resolution	0.1HR
Vertical Capacity	7.80"
Throat Depth	5.90"
Dimensions	23.62" W x 9.84" D x 27.56" H
Weight	220 lbs.
Power Supply	115V/60 HZ/1 phase
Items Included	C/N scale Diamond Indenter 1/16" Ball Indenter 2- HRC test Blocks 1- HRB Test Block 2- HRN Test Block 1- HRT Test Block Test Table 5.87" (150mm) Flat Anvil 2.5" (63mm) Std. V- Anvil Dust Cover Accessory Case

HARDNESS TESTERS

900-386 DIGITAL DEAD WEIGHT-MOTORIZED-ROCKWELL/SUPERFICIAL WITH TALL FRAME

This unit can measure Rockwell and superficial Rockwell hardness and change those values of Rockwell hardness into HB, HV, HLD, HK and σ_b values. Loaded with features such as ultra precise measurements, wide measuring range, automatic main test force loading/unloading, digitally displayed results, etc. The unit is suitable for hardness testing on carbon steel, alloy steel, cast iron, non ferrous metal and engineering plastics

The protruding indenter design is ideal for testing inside diameters and recesses, often impossible with more traditional hardness testers. Inside diameters as small as 1-1/2-inches can be tested with the standard indenter. Operators can test close to vertical surfaces, to within 1/4-inch with the standard indenter. Testing is fast, accurate and there are fewer broken diamonds due to an outstanding viewing area.

Minor Load	29.4N 3kgf, 98.1N (10kgf)
Major Load	147.1N(15kgf), 294.3N(30kgf), 441.3N(45kgf), 588.4N (60kgf), 980.7N (100kgf), 1471N (150kgf)
Test Force Application	Dead Weight
Test Force Control	Motorized
Results Display	Hi Def LCD Readout
Vertical Capacity	16.90"
Throat Depth	7.80"
Dimensions	15.75" W x 28.74" D x 39.37" H
Weight	285 lbs.
Power Supply	115V/60 HZ/1 phase

Items Included	C/N scale Diamond Indenter 1/16" Ball Indenter 2- HRC test Blocks 1- HRB Test Block 2- HRN Test Block 1- HRT Test Block Test Table 5.87" (150mm) Flat Anvil 2.5" (63mm) Std. V- Anvil Dust Cover Accessory Case

HARDNESS TESTERS

900-375 ANALOG DEAD WEIGHT-MANUAL-ROCKWELL/SUPERFICIAL

This analog Rockwell Hardness Tester tests both Rockwell hardness and Superficial Rockwell hardness in one unit, with state of the art design and dynamic precision. This unit is ruggedly engineered to obtain highly sensitive and accurate readings.

Conforming to ASTM E-18 Rockwell hardness standards, it will offer unmatched repeatability in all Rockwell hardness scales. A perfect performer suited for any environment including heat treatment facilities, tool rooms, workshops, laboratories and inspection labs.

All of our hardness testers come with a 5-year warranty and lifetime technical support

Minor Load	29.4N (3kgf), 98.1N (10kgf)
Major Load	147.1N(15kgf), 294.3N(30kgf), 441.3N(45kgf), 588.4N (60kgf), 980.7N (100kgf), 1471N (150kgf)

HARDNESS TESTERS

900-410 DIGITAL-DEAD WEIGHTS- MANUAL-ROCKWELL WITH CAST IRON BODY

The 900-410 Digital Rockwell Hardness Tester can be used directly to measure the most popular regular Rockwell hardness scales and it can quickly convert that hardness value into HB, HV, HLD, HK and many other scales. Loaded with many useful features such as ultra precise results, wide measuring range, scale and test force selectable, automatic main test force loading/unloading, high resolution digital display and USB data storage. The 900-410 is suitable for testing hardness of carbon steel, alloy steel, cast iron, non-ferrous metals and engineering plastics. The tester meets the following standard: ASTM E18, ISO 6508-2, and BS EN ISO6508-2.

Minor Load	98.1N (10kgf)
Major Load	60 Kgf, 100 Kgf, 150 Kgf
Test Force Application	Dead Weights
Test Force Control	Manual
Load Dwell Duration	2 - 50 seconds
Results Display	Hi definition backlight LCD
Resolution	0.1HR
Vertical Capacity	8.00"
Throat Depth	7.87"
Dimensions	8.07" W x 31.49" D x 22.04" H
Weight	175 lbs.
Power Supply	115V/60 HZ/1 phase
Items Included	Large Anvil Small Diameter Anvil V-shaped Anvil Five Test Blocks One each, HRA 70-85 One each, HRB 75-95 One each, HRC 25-35 One each, HRC 40-50 One each, HRC 55-65 120 deg. Diamond Indentor 1/16" Carbide Ball indentor Storage Box

HARDNESS TESTERS

900-331 ANALOG-DEAD WEIGHTS-MANUAL-ROCKWELL

The 900-331 Rockwell scale hardness tester is easy to operate, yet engineered to obtain highly sensitive and accurate readings. Conforming to ASTM E-18 Rockwell Hardness standards, the 900-331 tester will offer unmatched repeatability in all standard Rockwell Hardness scales (table shown below). A perfect, rugged performer suited for any environment including heat treat facilities, tool rooms, workshops, laboratories and inspection labs. Lifetime technical support is included.

FEATURES

Direct analog dial reading

Advanced design, easy to operate

Engineered to obtain highly sensitive and accurate readings

Conforms to ASTM E-18

Perfect for laboratories, workshops, tool rooms, inspection labs, etc.

Minor Load	98.1N (10kgf)
Major Load	60 Kgf, 100 Kgf, 150 Kgf
Test Force Application	Dead Weights
Test Force Control	Hydraulic Dashpot System
Load Dwell Duration	2 - 50 seconds
Results Display	Analog Dial Gage
Vertical Capacity	6.70"
Throat Depth	6.67"
Dimensions	8.50" W x 20.00" D x 30.00" H
Weight	242 lbs.
Power Supply	115V/60 HZ/1 phase
Items Included	C-scale Diamond Indentor 1/16" Ball Indentor 3- HRC Test Blocks 1- HRB Test Block 1-HRA Test Block Test Table 5.87" (150mm) Flat Anvil 2.5" (63mm) Std. Vee Anvil Accessory Case Dust Cover

HARDNESS TESTERS

900-366 DIGITAL-DEAD WEIGHTS- MOTORIZED-ROCKWELL WITH TALL FRAME

This digital Rockwell hardness tester with fully automated load/unload procedures affords highly sensitive and accurate readings. Micro computer controlled with USB output to built-in mini printer or PC. The 900-366 digital Rockwell hardness tester offers programmable scale conversions, dwell times, statistical capabilities and test counter. Capable of testing in all of the regular Rockwell® scales.

Automatic conversions to: HRN, HRT, HB, HV, HLD and σ_b .

FEATURES

Easily obtain Average, Min/Max, S, R
Menu selectable system
Upper/Lower Limit Settings
Memory of 500 test results
Curved Surface Auto Correction

Minor Load	98.1N (10kgf)
Major Load	588.4N (60kgf), 980.7N (100kgf), 1471N (150kgf)
Test Force Application	Dead Weights
Test Force Control	Motorized
Results Display	Hi Def LCD Readout
Resolution	0.1HR
Vertical Capacity	16.50"
Throat Depth	6.50"
Dimensions	7.87" W x 21.60" D x 28.34" H
Power Supply	115V/60 HZ/1 phase
Items Included	C scale Diamond Indenter 1/16" Ball Indenter Built-in mini printer 3- HRC Test Blocks 1- HRB Test Block 1- HRA Test Block Test Table 5.87" (150mm) Flat Anvil 2.5" (63mm) Std. V- Anvil Dust Cover Accessory Case

HARDNESS TESTERS

SUPERFICIAL HARDNESS TESTERS

900-346 DIGITAL LOAD-CELL-MOTORIZED-SUPERFICIAL WITH ONE TOUCH TESTING

This digital Superficial Rockwell hardness tester with fully automated load/unload procedures affords highly sensitive and accurate readings. Micro computer controlled Touch Screen with USB output to PC. The 900-346 digital Superficial Rockwell hardness tester offers programmable scale conversions, dwell times, statistical capabilities and test counter. Capable of testing in all of the regular Rockwell hardness scales

Direct Loading Method With Load-Cell Instead Of Dead Weight System. High Speed Test Cycle and Extremely Accurate Loading Control

Automatic conversions to HB, HV, Regular Rockwell Scales
Touch Screen selectable system
Upper/Lower Limit Settings

Minor Load	29.4N 3kgf
Major Load	147.1N(15kgf), 294.3N(30kgf), 441.3N(45kgf)
Test Force Application	Load Cell Closed Loop
Test Force Control	Motorized
Results Display	Hi Def LCD Readout
Resolution	0.01HR
Vertical Capacity	7.80"
Throat Depth	5.90"
Dimensions	9.84" W x 23.62" D x 27.56" H
Weight	220 lbs.
Power Supply	115V/60 HZ/1 phase
Items Included	N-scale Diamond Indenter 1/16" Ball Indenter 2- HRN Test Blocks 3- HRT Test Block Test Table 5.87" (150mm) Flat Anvil 2.5" (63mm) Std. V- Anvil Dust Cover Accessory Case

HARDNESS TESTERS

900-345 ANALOG-DEAD WEIGHTS-MANUAL-SUPERFICIAL

Used for testing thin and soft material in the Superficial Rockwell Hardness scales, this hardness tester is ruggedly engineered to obtain highly sensitive and accurate readings. Conforming to ASTM E-18 Superficial Rockwell Hardness standards, this hardness tester will offer unmatched repeatability in all Superficial Rockwell Hardness scales (table shown below). A perfect performer suited for any environment including heat treat facilities, tool rooms, workshops, laboratories and inspection labs. Lifetime technical support is also included.

FEATURES

Direct analog dial reading

Engineered to obtain highly sensitive and accurate readings

Conforms to ASTM E-18

Perfect for laboratories, workshops, tool rooms, inspection labs, etc.

For testing thin, soft material in the Superficial Rockwell scales (900-345)

Minor Load	29.4N 3kgf
Major Load	147.1N(15kgf), 294.3N(30kgf), 441.3N(45kgf)
Test Force Application	Dead Weights
Test Force Control	Manual
Results Display	Analog Dial Gage
Resolution	0.01HR
Vertical Capacity	6.70"
Throat Depth	6.60"
Dimensions	8.90" W x 19.60" D x 28.00" H
Weight	190 lbs.
Power Supply	115V/60 HZ/1 phase
Items Included	N-scale Diamond Indenter 1/16" Ball Indenter 3- HRN Test Blocks 3- HRT Test Block Test Table 5.87" (150mm) Flat Anvil 2.5" (63mm) Std. V- Anvil Dust Cover Accessory Case

HARDNESS TESTERS

BRINELL HARDNESS TESTERS

900-357 DIGITAL-LOAD CELL-MOTORIZED-BRINELL

This advanced model has 3 indentors and 2 objectives which covers all common Brinell scales and all loads from 62.5kgf to 3000kgf. The touch screen monitor shows instant Brinell readings and no manual scope is needed.

The test load is applied via a closed-loop control unit with a load cell, a DC motor and an electronic measurement and control unit. The result is highly accurate Brinell hardness tester measurements at all test loads up to 0.5%. The common load overshoot or undershoot as known from traditional dead weight, or open-loop, systems is eliminated. The absence of mechanical weights not only eliminates friction problems but also makes the equipment less sensitive to misalignments caused by vibrations.

The unit combines a touch screen computer and brinell hardness tester in one complete Brinell hardness testing package. All the required parameters can be selected on the panel computer. It's clear display and touch screen make it easy to use and eliminates user error. The clear video screen using it's CCD interface will directly display the dynamic indentation image, lock the image and automatically measure the Brinell hardness. The operator can choose the selectable conversion values among the hardness scales, save the results of each measurement and generate the image report. The load of test forces is accomplished using state of the art load cell system combined with precision mechanical drive.

Test Force (kgf)	62.5kgf, 100kgf, 125kgf, 187.5kgf, 250kgf, 500kgf, 750kgf, 1000kgf, 1500kgf, 3000kgf
Test Force (N)	612.9N, 980.7N, 1226N, 1839N, 2452N, 4903N, 7355N, 9807N, 14710N, 29420N
Test Range	3.18 – 653HBW
Loading Method	Automatic (LoadingDwell/Unloading)
Hardness Reading	Indentation Displaying and Automatic Measuring on Touch Screen
Computer	CPU: Intel I3, Memory: 2G, SSD: 32G
Conversion Scale	HV, HK, HRA, HRB, HRC, HRD, HRE, HRF, HRG, HRK, HR15N, HR30N, HR45N, HR15T, HR30T, HR45T, HS, HBS, HBW
Data Output	USB Port, VGA Interface, Network Interface
Turret Control	Automatic Recognition and Shifting (Three Indenters, Two Objectives)
Objectives	1X, 2X
Total Magnification	20X, 40X
Dwell Time	0-95 seconds
Max. Height of Sample	10.24" (260mm)
Throat	5.91" (150mm)
Standards	ISO 6506 ASTM E10-12 JIS Z2243 GB/T 231.2
Dimensions	12.99" W x 23.62" D x 46.06" H
Weight	331 lbs.

HARDNESS TESTERS

900-355 DIGITAL-LOAD CELL-MOTORIZED-BRINELL

Innovative closed-loop technology. The Brinell hardness tester incorporates the latest load cell technology. The test load is applied via a closed-loop control unit with a load cell, a DC motor and an electronic measurement and control unit. The result is highly accurate Brinell hardness measurements at all test loads up to 0.5%. The common load overshoot or undershoot as known from traditional dead weight, or open-loop, systems is eliminated. The absence of mechanical weights not only eliminates friction problems but also makes the equipment less sensitive to misalignments caused by vibrations.

The whole weight of the tester is 50% less than the traditional dead weights type tester.

Test load selection by keyboard and LCD screen.

Fully automatic test cycles. The Brinell Hardness Tester features a fully automatic test cycle, load application, holding, unloading, is performed fully automatically. This greatly improves reproducibility of test results since operator influence is eliminated.

Selectable dwell times by screen. The indenter, load, and other test information are shown clearly on the large LCD screen.

The directions for 0.102F/D² ratios selecting according to the materials and hardness range can be showing on the screen.

Equipped with a 20X optical microscope to measure the diameter of Brinell indentation.

Brinell Hardness Calculator (BHC) make the hardness value calculation easier and convenient.

Test Loads	3000kgf (29400N), 1500Kgf (14700N), 1000Kgf (9800N), 750Kgf (7355N), 500Kgf (4900N), 250Kgf (2452N), 187.5Kgf (1839N), 125Kgf (1226N), 100Kgf (980N), 62.5Kgf (612.9N)
Test Range	8 – 650HBW
Loading Method	Automatic (LoadingDwell/Unloading)
Hardness Reading	Indentation Displaying and Automatic Measuring on Touch Screen
Computer	CPU: Intel I3, Memory: 2G, SSD: 32G
Conversion Scale	HV, HK, HRA, HRB, HRC, HRD, HRE, HRF, HRG, HRK, HR15N, HR30N, HR45N, HR15T, HR30T, HR45T, HS, HBS, HBW
Data Output	USB Port, VGA Interface, Network Interface
Turret Control	Automatic Recognition and Shifting (Three Indenters, Two Objectives)
Total Magnification	20X
Dwell Time	2-99 seconds
Max. Height of Sample	9.06" (230mm)
Throat	5.51" (140mm)
Dimensions	10.24" W x 20.87" D x 29.53" H
Weight	243lbs.

HARDNESS TESTERS

900-356 DIGITAL-LOAD CELL- MOTORIZED-BRINELL WITH TALL FRAME

Innovative closed-loop technology. The tester incorporates the latest load cell technology. The test load is applied via a closed-loop control unit with a load cell, a DC motor and an electronic measurement and control unit. The result is highly accurate Brinell hardness measurements at all test loads up to 0.5%. The common load overshoot or undershoot as known from traditional dead weight, or open-loop, systems is eliminated. The absence of mechanical weights not only eliminates friction problems but also makes the equipment less sensitive to misalignments caused by vibrations.

The gross weight of the tester is 50% less than the traditional dead weights type testers.

Test load selection by keypad and shown on the LCD screen.

Fully automatic test cycles. The Brinell hardness Tester features a fully automatic test cycle, load application, dwell, unloading, is performed fully automatically. This greatly improves reproducibility of test results since operator influence is eliminated.

Weight	364lbs.

HARDNESS TESTERS

OPTICAL BRINELL READER

PHT-5000 OPTICAL BRINELL HARDNESS VIDEO MEASUREMENT SYSTEM

Friendly User Interface: Automatic measurement with a key stroke or a click of a button. Test results can be manually generated or corrected with a single mouse drag move

High reliability: Advanced image processing and analysis technologies in automatic measurement. Field proven under severe sample surface conditions;

Single camera with four magnifications: 1.3M pixel CMOS USB camera with two camera tubes with each tube height having two magnifications.

Full measurement range is covered with four magnifications for better measurement accuracy. Specifically, tube 1 magnification #1 is suitable for indentation diameters 3-6mm, magnification #2 for 0.8-1.6mm, while tube 2 magnification #3 for 2-4mm, and magnification #4 for 1-2mm.

Includes the basic functions of an imaging system such as image capture, camera calibration, image processing, geometric measurement, document labeling, and album management; automatically or manually measures the indentation diameter and calculates the Brinell hardness (HB) value; HB2 (DIN 1605 standard) automatic measurement:

Automatically or manually measures the indentation diameters on the calibration sample and the test sample, and automatically interpolates the Brinell hardness (HB) value for the test sample; Converts Brinell (HB) to other hardness scales—Validates the test results with sample dimensions; automatically updates the statistical values such as average, min and max, standard deviation, Cp and Cpk;

Auto-alarm: Automatically marks the out of spec measurements; **Test report:** Automatically generates customizable WORD or EXCEL report.

PORTABLE HARDNESS TESTERS

MEASURING METHODS: UCI & LEEB

There are two basic methods of portable hardness testing that is accepted in the field today.

“Ultrasonic Contact Impedance” is based on a 136 degree diamond at the end of a vibrating rod being depressed into the test surface at a fixed load. The difference in Ultrasonic vibration frequency is then calculated into a hardness value. The UCI test procedure is slower than the Dynamic Impact style, however the “UCI” method of hardness testing is portable, easy and accurate. It also has its own advantages when utilized for certain testing applications. UCI testers are not restricted to large mass items like dynamic type testers. These units can test metals as thin as 1mm and at a hardness value as low as 20HRC (75HB).

They also excel at performing hardness tests on larger, harder metals as well. Another reason for the rise in popularity is due to the fact that the UCI method is categorized as “Non-Destructive”. That translates into less scrap parts/ lower manufacturing costs due to necessary inspections.

“Dynamic Impact” is based on the Leeb principle of hardness, developed by Dietmar Leeb in the 1970's. A spring loaded impact body is thrust to the test surface, effecting rebound. The speed of both the initial thrust and the rebound is measured in a non-contact mode. This is calculated as a Leeb hardness value and then automatically converted to Rockwell C, B, Brinell, Vickers and Shore Values. It has effectually brought easy, fast and accurate results to portable hardness testing.

PHT-6000 SERIES FOR UCI (ULTRASONIC CONTACT IMPEDANCE) & DYNAMIC IMPACT (LEEB) HARDNESS TESTING

UCI PORTABLE HARDNESS TESTER W/MANUAL PROBE

PHT-6001 UCI HARDNESS TESTER

w/1kgf Probe

For use on polished surfaces. Below Ra 125µin

PHT-6002 UCI HARDNESS TESTER

w/2kgf Probe

For use on smooth surfaces. Below Ra 200µin

PHT-6005 UCI HARDNESS TESTER

w/5kgf Probe

For use on machined surfaces. Below Ra 400µin

PHT-6010 UCI HARDNESS TESTER

w/10kgf Probe

For use on rough surfaces. Below Ra 600µin

UCI PORTABLE HARDNESS TESTER W/MOTORIZED PROBE

PHT-6030 UCI HARDNESS TESTER

w/.30kgf Probe

Best for checking coating layer hardness; Finished thin parts

PHT-6080 UCI HARDNESS TESTER

w/.80kgf Probe

Best for smooth bearing type surfaces

PHT-6100 UCI HARDNESS TESTER

w/1kgf Probe

Best for machined surfaces

FEATURES

Non-Destructive hand held hardness tester

Combines UCI and Leeb hardness testing in one state of the art device

Test steel with min thickness of .08" and unlimited max thickness

Blazing fast test results

Rockwell, Brinell Vickers conversions shown on display

Large Memory w/USB Output

Choice of manual UCI probes; 1kg, 2kg, 5kg & 10kg

Optional Motorized Probes: .30kg, .80kg, & 1kgf

Available Impact Devices(Leeb) D, DC, D+15, G & DL

SPECIFICATIONS

Hardness Range: HRC: 20.3- 68; HRB: 61-85.6 ; HV: 80-1599; HB: 76-618

Scale Selection: Rockwell C (HRC); Rockwell B (HRB); Rockwell A (HRA); Brinell (HB); Vickers (HV); Leeb (HLD)

Tolerance: +/- 3.0% deviation of average from the reference value of the test block with a minimum of 5 tests

Display Type: LCD Color Screen w/Backlight, adjustable brightness

Language Selection: English, German, Chinese, Spanish, etc.

Data Logger: Letters, Numerals

Data Memory: 2000 groups of measured data ; 20 groups of calibration data

Statistical Software Supplied-can be saved in Word or Excel

Data Output: USB – cable supplied

Power Supply Rechargeable Lithium Battery: Voltage-4.2V, 4800mAh

Auto Power Off: 5 minutes

Recharging Time: Approx. 8 hours

Battery Usage: Approx. 6 hours (no backlight)

Net Weight(base unit): 2lbs (w/probe)

Unit Dimensions: 7.00" H x 3.10" W x 1.10" D

PORTABLE HARDNESS TESTERS

PHT-3500

State of the art, digital tester is designed to test the hardness of large hard metal parts. Loaded with useful functions and a built in mini-printer the PHT-3500 is clearly the industry leader for fast accurate hardness testing with advanced USB output and thermal printing capabilities. The PHT-3500 can perform tests that easily convert to the most popular hardness scales, including Rockwell, Brinell, Vickers, Shore, etc. Designed to test large hard parts. Example: Tool steel should be close to 1" thick of solid material.

SPECIFICATIONS

Accuracy: $\pm 0.5\%$ (referred to $L=800$,

Repeatability accuracy: $\pm 4L$ units) $L=Leeb$

Measuring range: 200-960 HL

Materials: steel & cast steel, alloy tool steel, stainless steel, grey cast iron, spheroidal iron, cast aluminum, brass, bronze, wrought copper alloy.

Battery type: AA alkaline (4)

Operating temperature: 5-104 degrees F

Dimensions: 150 x 74 x 32mm

Weight: 245 grams

PHT-2100

Our new Rugged all metal frame portable hardness tester is suited for rough environments such as mining facilities, pipeline, bridge and tower inspections, etc. and is packed with features typically found on high end models only. This new leeb hardness tester is designed to test the hardness of large hard metal parts. Loaded with useful functions only found on high priced models the PHT-2100 is clearly setting a new industry standard by being the most accurate, economically priced hardness tester on the market today. Fast test speeds coupled with memory and output, this unit is a hand's down winner whether you are out in the field or in the QC shop. The PHT-2100 can perform tests that easily convert to the most popular hardness scales, including Rockwell, Brinell, Vickers, Shore, etc. Designed to test large hard parts. Example: Tool steel should be close to 1" thick of solid material.

SPECIFICATIONS

Accuracy: $\pm 0.5\%$ (referred to $L=800$,

Repeatability accuracy: $\pm 4L$ units) $L=Leeb$

Measuring range: 200-960 HL

Materials: steel & cast steel, alloy tool steel, stainless steel, grey cast iron, spheroidal iron, cast aluminum, brass, bronze, wrought copper alloy.

Battery type: AA alkaline (2)

Operating temperature: 5-104 degrees F

Dimensions: 150 x 74 x 32mm

Weight: 245 grams

PORTABLE HARDNESS TESTERS

PHT-1900 SERIES

State of the art, digital portable hardness tester is designed to test the hardness of large hard metal parts. Clean crisp display shows the incredible functions that can only be found on this new portable hardness tester such as auto-probe detection, auto direction detector, single and multi-point calibration make the new 1900 the most versatile portable hardness tester in the industry. Blazing fast test speeds coupled with memory and output, this unit is a must have for virtually any work shop. The PHT-1900 portable hardness tester can perform tests that easily convert to the most popular hardness scales, including Rockwell, Brinell, Vickers, Shore, etc. Designed to test large hard parts:

Example: Tool steel should be close to 1" thick of solid Material

SPECIFICATIONS

Accuracy: $\pm 0.5\%$ (referred to $L=800$,

Dimensions: 150 x 74 x 32mm

Weight: 245 grams

PORTABLE HARDNESS TESTERS

PHT-1700 SERIES

Loaded with features, this economically priced portable hardness tester is capable of measuring the surface hardness of a broad variety of metals on flat and round surfaces. This instrument comes complete with the universal D impact device, calibrated test block and rugged carry case. Designed to test large hard parts. Example: Tool steel should be close to 1" thick of solid material

SPECIFICATIONS

Accuracy: $\pm 0.5\%$ (referred to $L=800$,

Repeatability accuracy: $\pm 4L$ units) $L=Leeb$

Measuring range: 200-960 HL

Materials: steel & cast steel, alloy tool steel, stainless steel, grey cast iron, spheroidal iron, cast aluminum, brass, bronze, wrought copper alloy.

Battery type: AAA alkaline (2)

Operating temperature: 5-104 degrees F

Dimensions: 108 x 62 x 25mm

Weight: 230 grams

ACCESSORIES FOR PORTABLE HARDNESS TESTERS

D-PROBE: METSHPHT1800-100

Universal standard unit. Will handle the majority of hardness testing applications. Weight: 75g

D+15 -PROBE: METSHPHT1800-110

Very narrow contact area with a set back measurement coil. This device is used to measure hardness in grooves and recessed surfaces. Weight: 80g

DL -PROBE: METSHPHT1800-115

This model features a needle front section with a diameter of 4mm and a length of 50mm. It is suitable for testing in extremely confined spaces, the base of grooves and on special components such as gear wheels. For use on steel and cast steel only!

DC-PROBE: METSHPHT1800-120

Very short impact device for those confined areas, i.e. inside bores for internal measurements. Conforms to the D measuring range. Weight: 50g

G-PROBE: METSHPHT1800-125

This device has an enlarged test tip, and an increased impact energy range (approx. 9 times the D, 72 ft-lb.). Can be used on lower quality finishes for measuring hardness in the Brinell range only (max. 650 HB). Designed to be used with heavy components such as heavy castings and forgings. Weight: 250g

C-PROBE: METSHPHT1800-130

A reduced impact energy impact device (approximately 1/4 of the D Type 2 ft-lb.) for measuring the hardness of surface hardened components, coatings, thin wall or impact sensitive components. Applies a small superficial indentation. Weight: 75g

**Abrasive
Cut-Off Wheels**

Abrasive cutting has proven to be one of the most effective methods for sectioning materials for Metallographic sample preparation. The key to achieving quality sections is to select the proper abrasive Cut-Off Wheel for your application. Choosing the correct wheel not only ensures ease of cutting, but also reduces the amount of damage introduced to the sample in the sectioning process. This greatly reduces time spent in subsequent grinding and polishing steps.

Lapmaster offers a wide variety of abrasive Cut-Off Wheels engineered for a variety of materials and applications; however, by combining different abrasive types, sizes and bonds Lapmaster Cut-Off Wheels can be developed for virtually any application.

To further assist you in choosing the Lapmaster Cut-Off Wheel for your application please contact your Lapmaster representative.

SECTIONING

**Diamond
Wafering Blades**

For applications which require greater precision and thin sectioning capability, Lapmaster recommends Diamond Wafering Blades. Diamond Wafering Blades should be used with a precision low speed wafering saw.

Low concentration blades are suggested for hard brittle materials and ceramics, while high concentration blades are used with metallics.

To further assist you in choosing the Lapmaster Wafering Blade for your application please contact your Lapmaster representative.

DIAMOND WAFERING BLADES

DESCRIPTION		PART NUMBER
3"x.006"x.5" High Concentration Wafering Blade	Ferrous Material	METSDCUTW03H006

Water Soluble Cutting Fluid Gold Formula - Gallon (20:1 mix ratio)	METSACUTGFLGALL
Blue Soluble Cutting Fluid - Gallon (20:1 mix ratio)	METSACUTBFLGALL
Cool Cut Lubricating Fluid for Slow Speed Saws - 1 Quart (30:1 mix ratio)	METSCOOLCUT0032
Dressing Stick For Wafering Blade (1 each)	METSDRESSTK0001

Compression Mounting

Mounting of specimens is generally required for providing a convenient way to hold a specimen while it is being ground and polished, or for preserving and edge for examination. Mounting materials fall into one of two categories:

1. Compression Mounting Materials
2. Cold Mount Mounting Materials

Compression mounting requires the use of heat and pressure in a mounting press to prepare a mounted specimen. Cold mounting is performed at room temperature using a two part castable system.

COMPRESSION MOUNTING

PHENOLICS

Lapmaster offers phenolic material in three different colors: black, green and red. Phenolic material is economical, easy to use and cures quickly. Packaged in convenient 5 Lbs. Containers, phenolic materials may also be purchased in larger bulk containers as well.

ULTRA FINE EPOXY MOUNTING POWDER

A fine epoxy mounting powder that offers superior flow characteristics, high hardness and excellent edge retention. Color: Black

EPOXY MOUNTING COMPOUND

Epoxy mounting powder that offers high hardness with excellent edge retention. Color: Black

DIALLYL PHTHALATE

Another high hardness, minimum edge separation compression mounting material. Lapmaster's product is glass filled. Color: Blue

LUCITE

Lucite is a transparent compression mount material which allows viewing into the specimen. Lucite is packaged in 5 Lbs. Containers.

DESCRIPTION	PART NUMBER
Red Phenolic - 5 lb. Container	METSBAKERED0005
Black Phenolic - 5 lb. Container	METSBAKEBLK0005

Black 1.25"	METSPREMBLK11/4
Black 1.50"	METSPREMBLK11/2

Cold Mounting

COLD MOUNTING

SLOW CURE EPOXY

2 Part "low" viscosity epoxy system offering a hard, low shrinkage mount. The low viscosity of this product offers superior flow properties. Cure time is 8 hours.

FAST CURE EPOXY

Lapmaster features an epoxy mounting system which offers excellent edge retention, good abrasion resistance, and fast cure time — approximately 30 minutes.

HEAT CURE EPOXY

Ultra low viscosity for excellent penetration of small parts, voids, cracks and other fine features. Extremely hard with low shrinkage and excellent edge retention. 90min cure time in oven at 131F (55C). Can mix large amounts in one batch and pour over a 4 hour time period (if left at room temp).

FAST CURE ACRYLIC

A two part acrylic mounting system which cures in approximately 15 minutes. It has good flow characteristics and good penetration into holes and recess.

DESCRIPTION	PART NUMBER
Slow Cure Epoxy (8 hour) - Resin - 32 oz.	METSEPOXRESS032
Slow Cure Epoxy (8 hour) - Resin - Gallon	METSEPOXRESS128
Slow Cure Epoxy (8 hour) - Hardener - 16 oz.	METSEPOXHARS016

Paraffina Wax Drops (1 Kg)	METSPETRACR006
Red Wax (25 ml)	METSPETRNCACR

Mounting Accessories

MOUNTING ACCESSORIES

MOLD CUPS

Designed for casting mounts with cold mounting materials from 1" - 1.5" diameters.

SPECIMEN CLIPS

Specimen clips are used to support specimens while the mounting material cures. Lapmaster offers both plastic and stainless steel support clips which are packaged in 100 piece containers.

MOLD RELEASE

Mold release is used to help eject the specimen from either the mounting press or mold. Lapmaster offers mold release for hot and cold mounting applications. It is available in aerosol spray, alcohol based liquid or a Non-Hazmat silicone liquid form.

DESCRIPTION	PART NUMBER
1.00" Disposable Mold Cups (Pack of 50)	METSMOLDCUP1.00
1.25" Disposable Mold Cups (Pack of 50)	METSMOLDCUP1.25

Abrasive Discs

Lapmaster offers a complete line of Abrasive Discs for your Metallographic sample preparation needs. These products are excellent for coarse and fine grinding of Metallographic specimens.

Our Discs feature premium graded silicon carbide bonded to a sturdy "C" weight backing. The premium graded silicon carbide allows high cutting rates, yet produces consistent and uniform finishes. The high performance resin bonding system permits wet or dry operation allowing for longer paper life.

These Discs are available in Plain Back and Water Resistant pressure-sensitive adhesive backings.

Our Abrasive discs are also available in Aluminum Oxide (ALOX) and Zirconia Alumina (ZA) for additional applications.

"LMDG" Diamond Discs

The LAPMASTER "LMDG" is an innovative diamond grinding disc that extends fine grinding to single-micron grit sizes! It replaces conventional polishing processes, achieving superior results in terms of material removal rate, surface quality, planarity of the sample and life of the consumable. Lapmaster "LMDG" provides for an easy, clean and efficient fine grinding process.

Uses only water for lubrication (NO SLURRY OR OIL)

Metal backing for use with a magnetic system.

A special resin bonded diamond grinding disc which offers significant improvements over other disc systems on the market today. These diamond discs are designed to replace over 200 sheets of the equivalent SiC grinding discs. With a more evenly distributed abrasive grain size you will achieve a uniform grind and perfect edge retention on a wide range of materials. With a steel backing to be used with a magnetic system.

Rough polishing discs are designed to be used with diamond suspensions (1 μ m thru 15 μ m) for the rough polishing step of ferrous materials such as steels and iron. Use a final polishing cloth after this step for finer polishing. These metal backed discs and metal backed polishing cloths work directly on a magnetic system.

10" (200mm) ALLEGRAN #1 Diamond Polishing Disc, for up to 1 μ m	METSALEG0100001
10" (200mm) ALLEGRAN #3 Diamond Polishing Disc, for 3 μ m to 6 μ m	METSALEG0100003
10" (200mm) ALLEGRAN #9 Diamond Polishing Disc, for 6 μ m to 15 μ m	METSALEG0100009
12" (200mm) ALLEGRAN #1 Diamond Polishing Disc, for up to 1 μ m	METSALEG0120001
12" (200mm) ALLEGRAN #3 Diamond Polishing Disc, for 3 μ m to 6 μ m	METSALEG0120003
12" (200mm) ALLEGRAN #9 Diamond Polishing Disc, for 6 μ m to 15 μ m	METSALEG0120009
14" (200mm) ALLEGRAN #1 Diamond Polishing Disc, for up to 1 μ m	METSALEG0140001
14" (200mm) ALLEGRAN #3 Diamond Polishing Disc, for 3 μ m to 6 μ m	METSALEG0140003
14" (200mm) ALLEGRAN #9 Diamond Polishing Disc, for 6 μ m to 15 μ m	METSALEG0140009

Rough polishing discs are designed to be used with diamond suspensions (1 μm thru 15 μm) for the rough polishing step of non-ferrous materials such as aluminum and soft alloys. Use a final polishing cloth after this step for finer polishing. These metal backed discs and metal backed polishing cloths work directly on a magnetic system.

Lapping Films

DIAMOND FILMS

Diamond films consist of a 3 mil polyester backing coated with a layer of precision graded diamond. These films are ideal for applications where flatness, and edge retention are critical such as electronic components or with samples composed of multiple materials of various hardness. Available in micron sizes ranging from 0.25 to 30 microns.

GRINDING & POLISHING

LMB SERIES POLISHING CLOTHS & PADS WITH STAINLESS STEEL METAL BACKING, FOR MAGNETIC SYSTEMS

MADE IN THE USA WITH THE HIGHEST QUALITY MATERIALS!

Available in all popular pad types and sizes for easy conversion to the LAPMASTER LMB Ssystem!

LMB-HGN Hard woven cloth pad used to replace some rough grinding steps when used with polycrystalline diamond. Use with diamond 6 micron and up. Most effective with 15 micron and up.

LMB-PLUS Synthetic nap polishing cloth specifically designed for sintered carbides and steels. For use with all micron sizes.

LMB-PANW Napless, non-woven textile. Excellent for flatness and edge retention on a wide range of materials; ferrous and non-ferrous metals, ceramics, PCB, minerals among others. Use with diamond 15 - 1 micron.

LMB-FWL A special woven 100% wool polishing pad. Used to polish ferrous metals, non-ferrous metals and polymers. Use with diamond 9 - 1 micron.

LMB-GLD Woven acetate polishing pad. Used for fine grinding and polishing of ferrous metals, non-ferrous metals, plastics and coatings. Used with diamond 9 - 3 micron.

LMB-FNL A final polishing cloth with a medium rayon nap. Excellent for final polishing on all materials with diamond or alumina. Use with diamond or alumina 5 - 0.02 micron.

LMB-ASFL Silk style polishing cloth used to produce mirror surfaces on ferrous and non-ferrous, and microelectronics. Best results obtained with 3-micron diamond and finer. Use diamond 9 - 1 micron.

LMB-DBN A final polishing cloth with a short synthetic nap. Excellent for final polishing on all materials with diamond or alumina. Use with diamond or alumina 5 - 0.02 micron.

LMB-RED Woven wool felt polishing pad. For polishing ferrous metals with aluminas less than 9 micron particle size.

LMB-SUPREME A long life, chemical resistant (CHEM), polyurethane polishing pad. Excellent for final polishing with alumina or colloidal silica. Most effective during chemicalmechanical polishing of soft non-ferrous materials. Use with alumina or colloidal silica, 1 - 0.02 micron.

GRINDING & POLISHING

LMR SERIES POLISHING CLOTHS & PADS WITH METALIZED RUBBER BACKING, FOR MAGNETIC SYSTEMS

MADE IN THE USA WITH THE HIGHEST QUALITY MATERIALS!

This is a more cost effective option than stainless steel metal backing

The metal impregnated rubber backing works equally as well at a lower cost to manufacture.

Available in all popular pad types and sizes for easy conversion to the LAPMASTER LMR Ssystem!

LMR-HGN Hard woven cloth pad used to replace some rough grinding steps when used with polycrystalline diamond. Use with diamond 6 micron and up. Most effective with 15 micron and up.

LMR-PLUS Synthetic nap polishing cloth specifically designed for sintered carbides and steels. For use with all micron sizes.

LMR-PANW Napless, non-woven textile. Excellent for flatness and edge retention on a wide range of materials; ferrous and non-ferrous metals, ceramics, PCB, minerals among others. Use with diamond 15 - 1 micron.

LMR-FWL A special woven 100% wool polishing pad. Used to polish ferrous metals, non-ferrous metals and polymers. Use with diamond 9 - 1 micron.

LMR-GLD Woven acetate polishing pad. Used for fine grinding and polishing of ferrous metals, non-ferrous metals, plastics and coatings. Used with diamond 9 - 3 micron.

LMR-FNL A final polishing cloth with a medium rayon nap. Excellent for final polishing on all materials with diamond or alumina. Use with diamond or alumina 5 - 0.02 micron.

LMR-ASFL Silk style polishing cloth used to produce mirror surfaces on ferrous and non-ferrous, and microelectronics. Best results obtained with 3-micron diamond and finer. Use diamond 9 - 1 micron.

LMR-DBN A final polishing cloth with a short synthetic nap. Excellent for final polishing on all materials with diamond or alumina. Use with diamond or alumina 5 - 0.02 micron.

LMR-RED Woven wool felt polishing pad. For polishing ferrous metals with aluminas less than 9 micron particle size.

LMR-SUPREME A long life, chemical resistant (CHEM), polyurethane polishing pad. Excellent for final polishing with alumina or colloidal silica. Most effective during chemicalmechanical polishing of soft non-ferrous materials. Use with alumina or colloidal silica ,1 - 0.02 micron.

GRINDING & POLISHING

POLISHING CLOTHS & PADS

Lapmaster Polishing Pads are offered in a wide range of sizes and are made from different types of materials to accommodate any polishing application, including Metallographic, petrographic, fiber optics, and many more.

SILK Recommended for rough polishing with diamond. Excellent for friable materials such as coal and petrographic samples. Available with plain backing only.

NTR A soft napped final polishing cloth best used with 6-micron diamond and finer. Available with PSA backing only.

LAPMASTER SUPREME A long life, chemical resistant, polyurethane polishing pad. Excellent for final polishing with alumina or colloidal silica. Available with PSA backing only.

MICRO LP 100% pure wool. Recommended for intermediate and final polishing stages with diamond or alumina. Available with PSA backing only.

ASR Synthetic silk mounted on a rigid backing. Best results obtained with diamond. Available with PSA backing only.

NYLON Napless nylon weave provides excellent finish on most materials. Excellent for flatness and edge retention. Available with plain and PSA backing.

PAN-W Napless, non-woven textile. Excellent for flatness and edge retention. Available with PSA backing only.

ASFL Silk style polishing cloth used to produce mirror surfaces. Best results obtained with 3-micron diamond and finer. Available with PSA backing only.

GOLD CLOTH Extremely durable, uniquely woven nylon, for use with diamond, 15-3 micron. Produces excellent flatness and provides a very high material removal rate on a wide variety of materials.

VELPOL A short nap synthetic velvet. Recommended for final polishing with diamond, alumina or colloidal silica. Available with PSA backing only.

ASF Similar to ASFL, but with a thicker, softer backing. Available with PSA backing only.

COTTON Recommended for rough polishing with diamond compound. Available with plain backing only.

FINAL POLISHING CLOTH A medium nap rayon cloth. Excellent for final polishing with diamond or alumina. Available with plain and PSA backing

SELVYT Medium nap cotton cloth. Excellent for intermediate or final polishing with diamond. Available with plain backing only.

GRINDING & POLISHING

POLISHING CLOTHS & PADS

DURA WOOL 100% black wool for general rough polishing with aluminum oxide powders & suspensions for steels and other ferrous based materials.

NYLON FINAL A Fine, short napped high density synthetic cloth. Excellent for final polishing with diamond and colloidal silica.

RED FELT 100% wool. Used on a wide variety of materials. Recommended for intermediate or final polishing with diamond.

IMPERIAL Final polish cloth recommended for softer materials. Excellent with colloidal silica and aluminas.

HEAVY NYLON Hard woven cloth pad used to replace some rough grinding steps when used with polycrystalline diamond.

FINE WOOL 100% wool cloth. Finer weave for final polishing with diamond.

SATIN Durable, synthetic silk style cloth used with diamond for intermediate and final polishing.

BROWN FINAL Durable, short nap synthetic used for final polishing with diamond or alumina.

STAINLESS STEEL DISC Re-usable Stainless metallic plate used with magnet discs or magnetic platens for convenient application and removal any PSA grinding or polishing consumable.

PSA MAGNET DISC Flexible, long lasting magnet disc with PSA backing to adhere to conventional platens.

GRINDING & POLISHING

Magnetic Mounting

STAINLESS STEEL DISC

A stainless, metallic plate for use with our magnetic discs or a magnetic platen for quick and convenient application and removal of any PSA consumable.

FLEXIBLE MAGNETIC

DISCS

These flexible, long lasting magnet discs have a PSA backing and are used to convert a conventional platen to a magnetic platen for use with our stainless steel disc.

MAGNETIC MOUNTING SYSTEMS

DESCRIPTION	PART NUMBER
8" PSA Magnetic Disc To Covert A Standard Polishing Plate To Magnetic	METSMAGSA080000
10" PSA Magnetic Disc To Covert A Standard Polishing Plate To Magnetic	METSMAGSA100000
12" PSA Magnetic Disc To Covert A Standard Polishing Plate To Magnetic	METSMAGSA120000
8" SS Disc for Mounting Polishing Cloths & Abrasive Discs	METSSTSTMAG0008
10" SS Disc for Mounting Polishing Cloths & Abrasive Discs	METSSTSTMAG0010
12" SS Disc for Mounting Polishing Cloths & Abrasive Discs	METSSTSTMAG0012
8" Teflon Coated SS Disc for Mounting Polishing Cloths & Abrasive Discs	METSSTSTTEF0008
10" Teflon Coated SS Disc for Mounting Polishing Cloths & Abrasive Discs	METSSTSTTEF0010

GRIT GRABBERS (REUSABLE PSA BACKING)

SOLD IN PACKS OF 10

DESCRIPTION	PART NUMBER
8" Double Sided PSA Disc For Attaching Plain Back Abrasive Discs	METSGRAB0080000
10" Double Sided PSA Disc For Attaching Plain Back Abrasive Discs	METSGRAB0100000
12" Double Sided PSA Disc For Attaching Plain Back Abrasive Discs	METSGRAB0120000

GRIT GRABBERS

Grit Grabbers are a reusable PSA backing used to affix plain backed Abrasive Discs and Polishing Cloths to our magnetic mounting system or your existing platen.

Diamond Pastes

Lapmaster's diamond compounds are formulated from the highest quality diamond. The tight tolerance particle size distribution guarantees consistent results. The water/oil soluble paste not only cleans easily, but also works well with most lubricants. Packaged in easy to use 18 gram syringes.

DIAMOND COMPOUNDS

MONOCRYSTALLINE DIAMOND COMPOUND

DESCRIPTION	PART NUMBER
18 Gram Syringe - 1/10 Micron Diamond Compound	METSDIAPS18K/10
18 Gram Syringe - 1/4 Micron Diamond Compound	METSDIAPS18K1/4
18 Gram Syringe - 1/2 Micron Diamond Compound	METSDIAPS18K1/2
18 Gram Syringe - 1 Micron Diamond Compound	METSDIAPS18K001
18 Gram Syringe - 3 Micron Diamond Compound	METSDIAPS18K003

18 Gram Syringe - 15 Micron Diamond Compound	METSDPCDS18KD15

GRINDING & POLISHING

Diamond Lubricants

DIAMOND LUBRICANTS & EXTENDERS

BLUE LUBE

Low viscosity, alcohol based diamond lubricant. Used to accommodate diamond to cut aggressively and when water based products cannot be used. Popular with our Diamond Aerosol Sprays. Packaged in pint and gallon containers.

RED LUBE

High viscosity, glycol based diamond lubricant. The high viscosity will reduce the aggressiveness of the diamond cutting to accommodate more delicate materials. Packaged in pint and gallon containers.

WATER BASED LUBRICANT

Clear, low viscosity, glycol based diamond lubricant. Aggressive diamond cutting and easy cleaning. Packaged in quart and gallon containers.

OIL BASED LUBRICANT

Purple, medium viscosity, petroleum and glycol based diamond lubricant. A product of our Lapping/Polishing production machine division. Offers a more reflective finish when used with diamond. Packaged in 500ml, 2.5 liter and 5 liter containers.

DESCRIPTION	PART NUMBER
Blue Lube - 16 oz. (alcohol-based)	METSLUBEBLUPINT
Blue Lube - 1 gallon (alcohol-based)	METSLUBEBUGALL
Red Lube - 16 oz. (Glycol-based)	METSLUBEREDPINT
Red Lube - 1 gallon (Glycol-based)	METSLUBEREDGALL
Water Based lubricant - 32 oz.	METSLUBEWAT0032
Water Based lubricant - 1 gallon	METSLUBEWAT0128
Oil Based Lubricant - 500ml	LAP5LUBP5000002
Oil Based Lubricant - 2.5 litre	LAP5LUBP2.50001
Oil Based Lubricant - 5.0 litre	LAP5LUBP5.00003

Diamond Aerosols

DIAMOND AEROSOL SPRAY 5oz. CAN

DIAMOND SPRAY

The diamond aerosol spray consists of high performance polycrystalline diamond in a quick evaporating carrier. The propellant is ozone safe and an inverted spray top makes dispensing to the cloth easy.

DESCRIPTION	PART NUMBER
1/4 Micron Diamond Aerosol Spray - Polycrystalline	METSDSPY00001/4
1 Micron Diamond Aerosol Spray - Polycrystalline	METSDSPY0000001
3 Micron Diamond Aerosol Spray - Polycrystalline	METSDSPY0000003
6 Micron Diamond Aerosol Spray - Polycrystalline	METSDSPY0000006
9 Micron Diamond Aerosol Spray - Polycrystalline	METSDSPY0000009
15 Micron Diamond Aerosol Spray - Polycrystalline	METSDSPY0000015
30 Micron Diamond Aerosol Spray - Polycrystalline	METSDSPY0000030

Diamond Suspensions

Lapmaster's diamond suspensions are low viscosity suspensions designed for high stock removal rates and precision finishes. They are water soluble, clean easily, and will not clog dispensing lines.

Diamond suspensions are available with either polycrystalline or monocrystalline diamond. Polycrystalline diamond has up to 300% more surface area than monocrystalline diamond resulting in much higher stock removal rates and finer scratch patterns. Polycrystalline diamond is recommended for hard materials, brittle coatings, or sample composed of mixed hardness.

DIAMOND SUSPENSIONS

POLYCRYSTALLINE DIAMOND SUSPENSION

DESCRIPTION	PART NUMBER
1/10 Micron Polycrystalline Suspension - 8 oz. With Pump Sprayer	METSDSUSPCD1/10
1/4 Micron Polycrystalline Suspension - 8 oz. With Pump Sprayer	METSDSUSPCD01/4
1/2 Micron Polycrystalline Suspension - 8 oz. With Pump Sprayer	METSDSUSPCD01/2

Powders & Slurries

ABRASIVE POWDERS & SLURRIES

ALUMINA POWDER

Lapmaster's alumina powders are high purity, polishing powders designed for final polishing of most metallographic specimens. They are available in two different versions – standard and deagglomerated. The standard version is suggested for most applications. The deagglomerated version goes through an extra milling procedure to breakdown agglomerates, and is recommended for final polishing of more critical applications. Both versions are available in three micron sizes: 0.05, 0.3 and 1.0 micron.

DESCRIPTION	PART NUMBER
0.05 Micron Alumina Powder - 1 lb.	METSALPD.0501LB
0.3 Micron Alumina Powder - 1 lb.	METSALPD0.301LB
1.0 Micron Alumina Powder - 1 lb.	METSALPD1.001LB
0.05 Micron Alumina Powder - 5 lb.	METSALPD.0505LB
0.3 Micron Alumina Powder - 5 lb.	METSALPD0.305LB
1.0 Micron Alumina Powder - 5 lb.	METSALPD1.005LB
0.05 Micron Deagglomerated Alumina Powder - 1 lb.	METSALPD.05D1LB
0.3 Micron Deagglomerated Alumina Powder - 1 lb.	METSALPD0.3D1LB
1.0 Micron Deagglomerated Alumina Powder - 1 lb.	METSALPD1.0D1LB
0.05 Micron Deagglomerated Alumina Powder - 5 lb.	METSALPD.05D5LB
0.3 Micron Deagglomerated Alumina Powder - 5 lb.	METSALPD0.3D5LB
1.0 Micron Deagglomerated Alumina Powder - 5lb	METSALPD1.0D5LB

ALUMINA SLURRY

Lapmaster' alumina slurry is formulated from the same high purity alumina used in our powders. These ready made slurries are not only easy to use, but guarantee consistent performance from lot to lot. Available in 0.05, 0.3 and 1.0 micron sizes, they are packaged in convenient to use 6 oz. Bottles or gallon containers.

DESCRIPTION	PART NUMBER
0.05 Micron Alumina Slurry - 6 oz.	METSALSY.0506OZ
0.3 Micron Alumina Slurry - 6 oz.	METSALSY0.306OZ
1.0 Micron Alumina Slurry - 6 oz.	METSALSY1.006OZ
0.05 Micron Alumina Slurry - 1 Gallon	METSALSY.050GAL
0.3 Micron Alumina Slurry - 1 Gallon	METSALSY0.30GAL
1.0 Micron Alumina Slurry - 1 Gallon	METSALSY1.00GAL
5.0 Micron Alumina Slurry - 1 Gallon	METSALSY5.00GAL

POLISHING SUSPENSIONS

COLLOIDAL SILICA

Colloidal silica is an excellent polishing solution for producing scratch-free specimens. It employs a chemical/mechanical action which delivers perfect finished on many materials. To achieve these fine finishes, the surface of the material being polished is chemically altered while very fine silica particles ranging from 0.02 – 0.06 micron remove the altered layer. Lapmaster's colloidal silica is non-freezing and non-drying thus eliminating many of the problems associated with other colloidal silica. The non-freezing characteristic allows the material to be shipped in cold weather without fear of the silica particles falling out of suspension. The non-drying characteristic allows a polishing cloth to be reused after drying out preventing the dried silica particles from re-crystallizing and forming large scratch producing agglomerates. We also now have new, low viscosity and non-crystallizing colloidal silica available at 0.05 micron and 0.04 micron.

COLLOIDAL ALUMINA

Colloidal alumina is an acidic dispersion which uses a chemical/mechanical action to produce superior surfaces. Outstanding results have been achieved on pure metals such as copper, nickel, tungsten, and beryllium, as well as steel and aluminum. Lapmaster's colloidal alumina is offered in 0.10 micron size.

DESCRIPTION	PART NUMBER
Colloidal Silica, 0.02 - 0.06 micron - 6oz.	METSCOLLSIL0006
Colloidal Silica, 0.02 - 0.06 micron - 32oz.	METSCOLLSIL0032
Colloidal Silica, 0.02 - 0.06 micron - 1 gal.	METSCOLLSIL0128
Colloidal Silica, 0.02 - 0.06 micron - 5 gal.	METSCOLLSIL0640

GRIT CONVERSION CHART

DEFINITIONS

ANSI

American National Standards Institute.

FEPA

Federation of European Producers of Abrasives. The FEPA distinguishes between grain for sanding paper (FEPA P) and grain for sharpening stones or wheels (FEPA F). The decisive factor for comparison is FEPA F. FEPA P is only used for sanding paper.

MICRON

As measuring unit it describes 1 thousandth of a millimeter ($1 \mu = 0.001 \text{ mm}$).

MM

Micro-mesh grit in comparison to other standards.
